West, 2011

Project Earth Science Astronomy Revised 2nd Edition involves students in activities that focus on Earth's position in our solar system. How do we measure astronomical distances? How can we look back in time as we gaze across vast distances in space? How would our planet be different without its particular atmosphere and distance to our star? What are the geometries among Earth, the Moon, and the Sun that yield lunar phases and seasons? Students explore these concepts and others in 11 teacher-tested activities.

Offering a fresh approach, this much-needed text mirrors the features that are traditionally found in nonfiction texts: illustrations, diagrams, insets, boxed materials to help clarify and explain the concepts being presented. This is a perfect complement to reading methods courses which includes a wealth of nonfiction titles that teachers can readily use effectively in a balanced literacy program. Packed with ideas and suggestions for the classroom, Pike and Mumper offer everything one needs to know in order to use nonfiction texts in the classroom, from using them in literature circles and as models for writing or for research purposes.
