Capitalism vs. Freedom Rob Larson, 2018-06-29 For years we've been taught that capitalism is good for freedom Dominant right wing talk radio hosts to this day recommend libertarian classics like Hayek's Road to Serfdom and Friedman's Capitalism and Freedom that claim markets free us and this picture still dominates the schools and the political spectrum Well get bent one percent because Rob Larson's Capitalism vs Freedom The Toll Road to Serfdom puts big business under a microscope This book debunks the conservative classics while demonstrating that the marketplace has its own great

centers of power which the libertarian tradition itself claims is a limit to freedom In fact Larson illustrates how capitalism fails both this and other concepts of human liberty not just failing to establish a right to a share of society's production but also leaving us subject to the great power plays of the one percent's corporate property

The American Middle Class Robert S. Rycroft, 2017-05-12 What is the American Dream This book's author argues that contrary to what many believe it is not achieving the wealth necessary to enter the top one percent but rather becoming members of the great middle class by dint of hard work and self discipline Americans of all classes consider themselves to be middle class There are Americans who by any objective standard should be considered poor who would insist they are middle class just as other Americans who should be considered wealthy also insist they are middle class Thinking of yourself and being thought of by others as middle class is the American Dream for tens of millions of people But an enduring problem of the American middle class is the worry that the Dream is coming apart that forces are lurking in the shadows waiting to steal their progress and throw them back into poverty This thought provoking reference explores a disparate multitude of issues associated with being middle class in America It addresses a range of questions and subtopics including the meaning of the term middle class how middle class status is expressed by both the majority and the various minorities that make up the American mosaic what economic pressures are bearing down on the middle class and how economists and others attempt to make sense of the economic issues of the day Readers will also better understand how political institutions and public policies are shaping the way the middle class views the world how labor housing education and crime related issues have influenced the development and growth of the middle class the norms of the middle class versus those of other classes in society and the role of culture and media in shaping how members of the middle class view themselves and how they are viewed by others This two volume set provides a comprehensive look at the American middle class that supports student research in economics social studies cultural studies and political history The content supports teachers in their development of lesson plans and assignments that directly align with the Common Core State Standards and the recommendations of the National Curriculum Standards for Social Studies NCSS with respect to all ten NCSS themes

Arab Water Security Hussein A. Amery, 2015-07-02 This book explores the national security implications of the Arab Gulf states reliance on desalination plants and their related infrastructure It provides the first systematic and comprehensive discussion of current and future threats to the supply of freshwater from a desalination plant including actual and virtual attacks by terrorists mechanical failure contamination sabotage by aggrieved workers and attacks relating to regional conflicts as well as their vulnerability to natural disasters It also provides a detailed analysis of the effects of a potential disruption to the water supply and proposes possible measures both political and technological that can be used to increase resilience to these threats Arab Water Security is a valuable reference for researchers and graduate students as well as for policy makers and professionals interested in water security natural resources and environmental terrorism
