Conducting Educational Design Research Susan McKenney, Thomas C Reeves, 2013-06-19 Educational design research blends scientific investigation with systematic development and implementation of solutions to educational problems Empirical investigation is conducted in real learning settings not laboratories to craft usable and effective solutions At the same time the research is carefully structured to produce theoretical understanding that can serve the work of others To support graduate students as well as experienced researchers who are new to this approach *Conducting Educational Design Research* integrates multiple perspectives of educational design research throughout this three part book Part one clarifies the educational design research origins approach and outcomes It also presents a generic model portraying the overall process Part two discusses the constituent elements of the model in detail these are analysis and exploration design and

construction evaluation and reflection and implementation and spread Part three offers recommendations for proposing reporting and advancing educational design research Through related readings and richly varied examples Conducting Educational Design Research offers clear and well documented guidance on how to conceptualize and conduct this stimulating form of inquiry For decades policies for educational research worldwide have swung back and forth between demanding rigor above all other concerns and increasing emphasis on impact These two qualities need not be mutually exclusive This volume supports readers in grasping and realizing the potential of educational design research It demonstrates how rigorous and relevant investigation can yield both theoretical understanding and solutions to urgent educational problems

Argumentation in Science Education Sibel Erduran, María Pilar Jiménez-Aleixandre, 2007-12-06 Our conversations about arguments began in Nashville in the Spring of 1996 in Richard Duschl's doctoral seminar that we were both attending Marilar Jim nez Aleixandre as a visiting scholar at Vanderbilt University Jim nez Aleixandre and Duschl were designing authentic problems in genetics for the University of Santiago de Compostela based RODA project aimed at engaging high school students in argumentation Erduran and Duschl had been working on Project SEPIA extending their work in Pittsburgh schools to the design of curricula that support epistemological aspects of scientific inquiry including argumentation In that spring we attended a NARST's sion in St Louis where Gregory Kelly Steven Druker and Catherine Chen presented a paper about argumentation As a consequence a symposium about argumentation was organised possibly the first of its kind at the 1997 NARST meeting in Chicago including papers from Kelly and colleagues and from Jim nez Aleixandre Bugallo and Duschl The symposium was attended among others by Rosalind Driver who had just submitted an application for funding of an argumentation project based at King's College London a project Erduran would incidentally work on after Driver's untimely death From this time frame in the 1990s to the present day argumentation studies in science education have increased at a rapid pace from stray papers for which we were unable to find an appropriate strand in a conference to a wealth of research base exploring ever more sophisticated issues
