

"innermost being of architecture," which holds that the process is linked by an anthropological intelligence inherent in architecture. Christopher Alexander's "timeless way of building" shows that we who live in the present can have a communication with the past and are the creators of those great buildings that were born spontaneously from the earth, are inspiring. We would like to use this book to carry on this spirit. However, Louis Kahn's work, where buildings are experienced and appreciated, is used in a passive context. By comparison, the intention of this book is to add communality to architecture in a more active design context, with the experience of buildings and urban space. For this, a method of detecting communality is necessary. We shall start from communities in which communality is materialized, the circumstances are manifest in a material context.

What we first envision is a situation whereby buildings are largely similar but have slight individual differences, even open

regions or in a situation where they are arranged in the same street. Although each of these buildings is the property of a different owner, it participates in the village or urban space through its roof and facade, and these elements transmit ownership to form part of the whole. This is evident through observations of multiple buildings. The common characteristics that transcend individual differences are termed the typology of architecture. However, typological understanding is for researchers, whereas communality is where the people who inhabit the space have common experience of the type of building. Typology of this kind is established when there are people that know what type of building is suitable for an area or town, such people have pride in their own town and are full of self-confidence.

Another thing we envision is a situation in which people behave with freedom in a square or similar open space. Although, of course, it is rare for all behaviors to be completely discrete, we must focus on only a few behaviors. Here, a behavior is a form connected to a certain place whose repetition transmits differences in subjects. Due to this, it is possible for a place and time to be jointly owned by people who do not know each other, who are aware of their mutual differences and who do not interfere with each other. Interestingly, a behavior that is repeated several times becomes a skill of the people performing it. Thus, a behavior belongs to each of the people and belongs to the place; it can be learned and cannot be monopolized by any one single person. Conversely, it is not easy to prevent another person performing the same behavior. A behavior is properly belonging to the person who has learned it and, simultaneously, a continuously owned property. The behaviors of people who know how to behave have aspects that are sophisticated, gentle, and reassuring. And this is precisely why they are allowed to
