Unmanned Aerial Remote Sensing David R. Green, 2020-07-10 Unmanned Aircraft Systems UAS are a rapidly evolving technology with an expanding array of diverse applications In response to the continuing evolution of this technology this book discusses unmanned aerial vehicles UAVs and similar systems platforms and sensors as well as exploring some of their environmental applications It explains how they can be used for mapping monitoring and modeling a wide variety of different environmental aspects and at the same time addresses some of the current constraints placed on realizing the potential use of the technology such as s flight duration and distance safety and the invasion of privacy etc Features of the book Provides necessary theoretical foundations for pertinent subject matter areas Introduces the role and value of UAVs for geographical data acquisition and the ways to acquire and process the data Provides a synthesis of ongoing research and a focus on the

use of technology for small scale image and spatial data acquisition in an environmental context Written by experts of the technology who bring together UAS tools and resources for the environmental specialist Unmanned Aerial Remote Sensing UAS for Environmental Applications is an excellent resource for any practitioner utilizing remote sensing and other geospatial technologies for environmental applications such as conservation research and planning Students and academics in information science environment and natural resources geosciences and geography will likewise find this comprehensive book a useful and informative resource

Proceedings of the 2nd International and Interdisciplinary Conference on Image and Imagination Enrico Cicalò, 2020-03-17 This book gathers peer reviewed papers presented at the 1st International and Interdisciplinary Conference on Image and Imagination IMG 2019 held in Alghero Italy in July 2019 Highlighting interdisciplinary and multi disciplinary research concerning graphics science and education the papers address theoretical research as well as applications including education in several fields of science technology and art Mainly focusing on graphics for communication visualization description and storytelling and for learning and thought construction the book provides architects engineers computer scientists and designers with the latest advances in the field particularly in the context of science arts and education

Bridge Maintenance, Safety, Management, Digitalization and Sustainability Jens Sandager Jensen, Dan M. Frangopol, Jacob Wittrup Schmidt, 2024-07-12 Bridge Maintenance Safety Management Digitalization and Sustainability collects the lectures and technical papers presented at the 12th International Conference on Bridge Maintenance Safety and Management IABMAS 2024 Copenhagen Denmark 24 28 June 2024 This Open Access book contains 480 contributions including the T Y Lin Lecture 9 Keynote Lectures and 470 technical papers from 44 countries The contributions are presented bring together academic and technological developments in Bridge Maintenance Safety Management Digitalization and Sustainability to solve new and old problems with innovative solutions Major topics include advanced bridge design construction and maintenance approaches safety reliability and risk evaluation life cycle management life cycle resilience sustainability standardization analytical models bridge management systems service life prediction structural health monitoring non destructive testing and field testing robustness and redundancy durability enhancement repair and rehabilitation fatigue and corrosion extreme loads needs of bridge owners

whole life costing and investment for the future financial planning and application of information and computer technology extensive data analysis and artificial intelligence for bridges among others Bridge Maintenance Safety Management Digitalization and Sustainability provides an up to date overview of the field of bridge engineering and significant contributions to making more rational decisions on bridge safety maintenance management life cycle resilience sustainability and bridge innovations to enhance society's welfare The Editors hope that this book will serve as a valuable reference to all concerned with bridge structure and infrastructure systems including engineers researchers academics and students from all areas of bridge engineering

Bridge Safety, Maintenance, Management, Life-Cycle, Resilience and Sustainability

Joan Ramon Casas, Dan M. Frangopol, Jose Turmo, 2022-06-27 Bridge Safety Maintenance Management Life Cycle Resilience and Sustainability contains lectures and papers presented at the Eleventh International Conference on Bridge Maintenance Safety and Management IABMAS 2022 Barcelona Spain 11-15 July 2022 This e-book contains the full papers of 322 contributions presented at IABMAS 2022 including the T.Y. Lin Lecture 4 Keynote Lectures and 317 technical papers from 36 countries all around the world The contributions deal with the state of the art as well as emerging concepts and innovative applications related to the main aspects of safety maintenance management life cycle resilience sustainability and technological innovations of bridges Major topics include advanced bridge design construction and maintenance approaches safety reliability and risk evaluation life cycle management life cycle resilience sustainability standardization analytical models bridge management systems service life prediction structural health monitoring non-destructive testing and field testing robustness and redundancy durability enhancement repair and rehabilitation fatigue and corrosion extreme loads needs of bridge owners whole life costing and investment for the future financial planning and application of information and computer technology big data analysis and artificial intelligence for bridges among others This volume provides both an up to date overview of the field of bridge engineering and significant contributions to the process of making more rational decisions on bridge safety maintenance management life cycle resilience and sustainability of bridges for the purpose of enhancing the welfare of society The volume serves as a valuable reference to all concerned with and/or involved in bridge structure and infrastructure systems including students researchers and practitioners from all areas of bridge engineering

Women in conservation and restoration ecology 2022 Diana Hamilton, Myriam A. Barbeau, Isabel Marques, Clare Morrison, Alienor Chauvenet, 2024-04-30 Decorrelative Mollifier Gravimetry Willi Freeden, 2021-05-12 This monograph presents the geoscientific context arising in decorrelative gravitational exploration to determine the mass density distribution inside the Earth First an insight into the current state of research is given by reducing gravimetry to mathematically accessible and thus calculable decorrelated models In this way the various unresolved questions and problems of gravimetry are made available to a broad scientific audience and the exploration industry New theoretical developments will be given and innovative ways of modeling geologic layers and faults by mollifier regularization techniques are shown This book is

dedicated to surface as well as volume geology with potential data primarily of terrestrial origin For deep geology the geomathematical decorrelation methods are to be designed in such a way that depth information e g in boreholes may be canonically entered Bridging several different geo disciplines this book leads in a cycle from the potential measurements made by geoengineers to the cleansing of data by geophysicists and geoengineers to the subsequent theory and model formation computer based implementation and numerical calculation and simulations made by geomathematicians to interpretation by geologists and if necessary back It therefore spans the spectrum from geoengineering especially geodesy via geophysics to geomathematics and geology and back Using the German Saarland area for methodological tests important new fields of application are opened particularly for regions with mining related cavities or dense development in today s geo exploration

Remote Sensing Applications for Agriculture and Crop Modelling Piero Toscano,2020-02-13 Crop models and remote sensing techniques have been combined and applied in agriculture and crop estimation on local and regional scales or worldwide based on the simultaneous development of crop models and remote sensing The literature shows that many new remote sensing sensors and valuable methods have been developed for the retrieval of canopy state variables and soil properties from remote sensing data for assimilating the retrieved variables into crop models At the same time remote sensing has been used in a staggering number of applications for agriculture This book sets the context for remote sensing and modelling for agricultural systems as a mean to minimize the environmental impact while increasing production and productivity The eighteen papers published in this Special Issue although not representative of all the work carried out in the field of Remote Sensing for agriculture and crop modeling provide insight into the diversity and the complexity of developments of RS applications in agriculture Five thematic focuses have emerged from the published papers yield estimation land cover mapping soil nutrient balance time specific management zone delineation and the use of UAV as agricultural aerial sprayers All contributions exploited the use of remote sensing data from different platforms UAV Sentinel Landsat QuickBird CBERS MODIS WorldView their assimilation into crop models DSSAT AQUACROP EPIC DELPHI or on the synergy of Remote Sensing and modeling applied to cardamom wheat tomato sorghum rice sugarcane and olive The intended audience is researchers and postgraduate students as well as those outside academia in policy and practice

Cemeteries and the Life of a Smoky Mountain Community Gary S. Foster,William E. Lovekamp,2019-07-04 In one of the few studies to draw upon cemetery data to reconstruct the social organization social change and community composition of a specific area this volume contributes to the growing body of sociohistorical examinations of Appalachia The authors herein reconstruct the Cades Cove community in the Great Smoky Mountains of Tennessee USA a mountain community from circa 1818 to 1939 whose demise can be traced to the establishment of the Great Smoky Mountains National Park By supplementing a statistical analysis of Cades Cove s twenty seven cemeteries completed as a National Park Study GRSM 01120 with ethnographic examination the authors reconstruct the community in detail to reveal previously overlooked social patterns and interactions

including insight into the death culture and death lore of the Upland South This work establishes cemeteries as window into proxies of communities demonstrating the relevance of socio demographic data presented by statistical and other analyses of gravestones for Appalachian Studies Regional Studies Cemetery Studies and Sociology and Anthropology
