Life Orientation Project Memorandum For 2015:

Developing Organizational Maturity for Effective Project Management Silvius, Gilbert, Karayaz, Gamze, 2018-03-09

Despite criticism for their serious shortcomings maturity models are widely used within organizations. The appropriate applications of these models can lead to organizational and corporate success. *Developing Organizational Maturity for Effective Project Management* is a critical scholarly publication that explores the successes and failures of maturity models and how they can be applied competently to leadership within corporations. Featuring coverage on a wide array of topics such as project management maturity, agile maturity, and organizational performance, this publication is geared toward professionals, managers, and students seeking current research on the application of maturity models to corporate success.

Handbook of Ethnography in Healthcare Research Paul Hackett, Christopher Hayre, 2020-12-02. This handbook provides an up-to-date reference point for ethnography in healthcare research. Taking a multi-disciplinary approach, the chapters offer a holistic view of ethnography within medical contexts. This edited volume is organized around major methodological themes such as ethics, interviews, narrative analysis, and mixed methods. Through the use of case studies, it illustrates how methodological considerations for ethnographic healthcare research are distinct from those in other fields. It has detailed content on the methodological facets of undertaking ethnography for prospective researchers to help them to conduct research in both an ethical and safe manner. It also highlights important issues such as the role of the researcher as the key research instrument, exploring how one's social behaviours enable the researcher to get closer to his/her participants and thus uncover original phenomena. Furthermore, it invites critical discussion of applied methodological strategies within the global academic community by pushing forward the use of ethnography to enhance the body of knowledge in the field. The book offers an original guide for advanced students, prospective ethnographers, and healthcare professionals aiming to utilize this methodological approach.

Challenging Anthropocene Ontology Elisa Randazzo, Hannah Richter, 2024-04-18. Using the recent turn to ecology as a starting point, Hannah Richter and Elisa Randazzo bring ecological thinking into contact with Critical Indigenous Studies, in which awareness of the necessity for sustainable relations between humans and non-humans has long preceded Western Anthropocene discourse. Currently, the drastic ecological changes labelled as the Anthropocene not only increasingly shape the political awareness and the priorities of citizens and governments but also inform a large body of social scientific scholarship. Indigenous scholarship and practice, in particular, ecological adaptability is intrinsically related to power structures and political struggle; hence, indigenous understanding of Anthropocene discourses are intertwined with discourses of colonialism and political contestation. This book problematises the depoliticising character of Western Anthropocene discourses in relation to indigenous ecologies. The authors reveal how the anti-colonial struggles of Indigenous communities and the unequal distribution of responsibilities for and suffering from ecological change are concealed and devalued in Western discourses of the Anthropocene.

Academic Libraries and Public Engagement With Science and Technology Eileen Harrington, 2019-03-28 Libraries have historically played a role as a community builder providing resources and spaces where knowledge can be archived shared and created. They can also play a pivotal role in fostering the public's understanding of science and scientific processes. From makerspaces to data visualization labs to exhibits many libraries already delve into scientific explorations and many more could join them. Scientists often need to include broader impacts goals in grant proposals but they might not know where to begin or feel that they do not have the time to devote to public engagement. This is where libraries and librarians can help. Research in science communication also supports tapping into libraries for public engagement with science. Studies show that it is important for scientists to present findings in an apolitical way not aligning with one solution or one way of thinking and not being seen as an activist. Druckman 2015 Jamieson Hardy 2014. One of the core tenets of librarians and libraries is to present information in a neutral way. Research also shows that informal conversations about science can have a greater

effect on people than reading about it online or hearing about it on the news Eveland Cooper 2013 Again libraries can play a role in fostering these types of conversations Given this landscape this book will demonstrate concrete ways that libraries and librarians can play a role in fostering public engagement with science In addition to background information on the current landscape of public knowledge and understanding of science it will also include best practices and case studies of different types of programming and services that libraries can offer Often libraries do not jump to mind when people think about science education or science literacy and many librarians do not come from a science background Literature on science programming and sharing science is largely absent from the library field This book will help give confidence to librarians that they can participate in engaging the public with science At the same time it will provide a conduit to bring informal science educators communication officers from universities or research organizations who share scientific discoveries with the public and librarians together to explore ways to align their work to promote scientific literacy for all

Effective Construction Project Delivery Titus Ebenezer Kwofie, Clinton Aigbavboa, Wellington Thwala, 2020-06-10 This book focuses on the development of communication skills in the context of non traditional procurement and construction projects It helps readers to understand the fundamentals of non traditional procurement and highlights the inherent communication challenges that arise as well as how to solve them The book is divided into four parts the first of which provides an introduction to communication discussing the theoretical concepts and contextual nature of communication as well as its benefits The second part goes into more depth discussing communication in the context of construction project delivery and non traditional procurement systems what these two terms actually mean and what effective communication looks like in these contexts Part III offers solutions to the inherent challenges of communication including the use of information and communications technology while the book s fourth and final part explores the future of construction communication Given the scope of its content the book represents a valuable asset for researchers professionals and students in the areas of procurement management and construction management
