

Meet the 22-year-old with a big idea for cleaning up the Great Pacific Garbage Patch.

One young ocean lover is confronting this challenge head on. At just 22, Boyan Slat has created a barrier system that's designed to collect and remove trash from the Pacific Ocean without disrupting marine life. A Dutch inventor and entrepreneur, Slat is the founder and CEO of The Ocean Cleanup, a foundation dedicated to developing advanced technologies to rid the oceans of pollution. When he was 16, Slat came up with the ambitious idea to clean up the oceans while he was diving in Greece and came across more plastic bags than fish. In the years since that dive he's dedicated countless hours to the project. "I really think the only way to show that it can be done is to go out there and try it," he says.

Museums as Sites of Transformative Foreign Language Learning Beyond the Classroom Fabiana Fazzi, 2025-01-23 This book takes a look at the affordances of engaging second foreign language students in educational projects that bridge the gap between the classroom and the museum. Studies on language learning and teaching beyond the classroom have shown that students learn in different settings and through different types of activities and that their learning is influenced by the intersection of different dimensions. Drawing on both language and museum learning and teaching research, this book discusses the aspects that make the museum an ideal language learning setting and then outlines evidence-based pedagogical guidelines to design effective learning experiences for language learners across the classroom and the museum. It will be of interest to graduate students, language teachers, teacher trainers, museum educators, and researchers in fields including Educational Linguistics, Anthropological Linguistics, and Museum Studies Education.
