Student Activities in Life Science 2/E William S. Pinkston, 2005-06 **Against** Tad DeLay, 2019-08-06 What does the white evangelical want In our moment of crisis and rage this question is everywhere Scholars ask from where its desires emerged pundits divine its political future and the public asks how we lapsed into social chaos For their part white evangelicals feel misunderstood while failing to see the direction of their ambitions We must interrogate its aims not only through its past or current trends but also through the various fantasies by which it rejects and enlivens reality Against traces five zones of opposition future knowledge sexuality reality and society If climate change is the greatest threat civilization has ever faced then a faith aiding collapse must face analysis If it swims in assured forgiveness it feels no shame for its sins against humanity If it wants a king it threatens democracy If it veils xenophobia it shall be ever more cruel In a critical and accessible history of odd ideas DeLay chronicles the past and sketches its troubling future It might die but what is certain is that a faith built on nostalgia and supremacy won't moderate We live in dangerous times so let us consider its justifications turmoil appetite and catastrophe

Hijacking History Kathleen Wellman, 2021-08-18 The teaching of history has long been the subject of partisan warfare Religion often plays a prominent role in these debates as secular progressives and conservative Christians disagree over which historical figures are worthy of study how or whether certain events should be portrayed and ultimately how tax dollars should be spent But what about students who are educated outside the public schools either in religious schools or at home How are they learning history and what effect does that have on our democracy Hijacking History analyzes the high school world history textbooks produced by the three most influential publishers of Christian educational materials In these books the historian informed by his faith tells the allegedly unbiased story of God's actions as interpreted through the Bible History becomes a weapon to judge and condemn civilizations that do not accept the true God or adopt biblical positions In their treatment of the modern world these texts identify ungodly ideas to be vanquished evolution humanism biblical modernism socialism and climate science among them The judgments found in these textbooks Kathleen Wellman shows are rooted in the history of American evangelicals and fundamentalists and the battles they fought against the tide of secularism In assuming that God sanctions fundamentalist positions on social political and economic issues students are led to believe that the ultimate mission of America is to succeed as a nation that advances evangelical Christianity and capitalism throughout the world The Christianity presented in these textbooks is proselytizing intolerant of other religions and non evangelical Christians and unquestionably anchored to the political right As Hijacking History argues the ideas these textbooks promote have significant implications for contemporary debates about religion politics and education and pose a direct challenge to the values of a pluralistic democracy
