interviews with students it addresses the key facets of schooling which influence young people's experiences. With chapters organised thematically including ability grouping, school climate and the impact of high stakes examinations, the central dimensions of school structure and process are explored. Placing young people's voices centre stage, it explores how they respond to the school context and make decisions that will profoundly affect their future. This book contrasts different types of school settings and examines how gender and social class play out at the school level.

The Spanish Military and Warfare from 1899 to the Civil War José Vicente Herrero Pérez, 2017-09-14. This book explores the attitudes of the Spanish army officer corps towards the evolution of warfare during the early decades of the twentieth century and their influence on the armies of the Spanish Civil War. It examines how the Spanish military coped with technological innovations such as the machine gun and the tank, how it adapted the army's battlefield doctrine to changes in warfare before the Civil War, and the influence of this doctrine on the outcome of the conflict. Of the different armed forces that fought in the Spanish Civil War, it is paradoxically the Spanish army that remains most forgotten, especially its military doctrine. Scholarship on the Spanish military in this period focuses on its politics, ideology and institutional reforms, touching upon hard professional issues only superficially, if at all. Based on original research and using largely unstudied Spanish primary sources, this book fills a major scholarly gap in the history of the Spanish army and the Spanish Civil War.

Promoting Equitable Access to Education for Children and Young People with Vision Impairment Mike Mclinden, Graeme Douglas, Rachel Hewett, Rory Cobb, Sue Keil, Paul Lynch, Joao Roe, Jane Stewart Thistlethwaite, 2022-09-30. Promoting Equitable Access to Education for Children and Young People with Vision Impairment offers a suitable vocabulary and developmental route map to examine the changing influences on promoting equitable access to education for learners with vision impairment in different contexts and settings throughout a given educational pathway. Bringing together a wide range of perspectives, this book argues that inclusive educational systems and teaching approaches should focus upon promoting and sustaining a balanced curriculum. It provides an analysis of how a suitable curriculum balance can be promoted and sustained through the stages of a given educational pathway to ensure equitable access and progression for all learners with vision impairment. The authors draw on the United Kingdom as a country study to illustrate the complex ecosystem within which learners with vision impairment are educated. Structured around a framework which provides a conceptually coherent and practical balance between universal and specialist approaches, this book is a relevant read for educators, academics and researchers involved in vision impairment education, as well as officials in government and non-government organisations engaged in developing education policy relating to inclusive education and disability.
