Life Science Caps 2014 Grade12 Teachers Guide:

Evolution Education Around the Globe Hasan Deniz, Lisa A. Borgerding, 2018-06-21 This edited book provides a global view on evolution education. It describes the state of evolution education in different countries that are representative of geographical regions around the globe such as Eastern Europe, Western Europe, North Africa, South Africa, North America, South America, Middle East, Far East, South East Asia, Australia, and New Zealand. Studies in evolution education literature can be divided into three main categories: a) understanding the interrelationships among cognitive, affective, epistemological, and religious factors that are related to people's views about evolution; b) designing/implementing/evaluating evolution education curriculum that reflects contemporary evolution understanding; and c) reducing antievolutionary attitudes. This volume systematically summarizes the evolution education literature across these three categories for each country or geographical region. The individual chapters thus include common elements that facilitate a cross-cultural meta-analysis. Written for a primarily academic audience, this book provides a much-needed common background for future evolution education research across the globe.

Study and Master Life Sciences Grade 12 Teacher's Book Annemarie Gebhardt, Peter Preethlall, Sagie Pillay, Philip Van Rensburg, 2007-08-31 Study Master Life Sciences was developed by practising teachers and covers requirements per RNCS.

Complexity and Simplicity in Science Education David Geelan, Kim Nichols, Christine V. McDonald, 2022-01-25 This edited volume brings together a broad range of international science education studies focusing on the interplay of teaching and learning science. It recognizes the complexity present in today's education associated with major science-related issues faced by society such as climate change, diseases, and pandemics, global conflicts over energy, food, and water. The studies discussed in this volume are focused on presenting different opportunities to teach these convoluted matters in order to find simplicity within the complexity and make it accessible to learners. They bring together the challenges of preparing the students of today to become scientifically informed citizens of tomorrow.
