International Handbook of Mathematical Learning Difficulties Annemarie Fritz,Vitor Geraldi Haase,Pekka Räsänen,2019-01-30 This comprehensive volume provides teachers researchers and education professionals with cutting edge knowledge developed in the last decades by the educational behavioural and

neurosciences integrating cognitive developmental and socioeconomic approaches to deal with the problems children face in learning mathematics The neurocognitive mechanisms and the cognitive processes underlying acquisition of arithmetic abilities and their significance for education have been the subject of intense research in the last few decades but the most part of this research has been conducted in non applied settings and there s still a deep discrepancy between the level of scientific knowledge and its implementation into actual educational settings Now it s time to bring the results from the laboratory to the classroom Apart from bringing the theoretical discussions to educational settings the volume presents a wide range of methods for early detection of children with risks in mathematics learning and strategies to develop effective interventions based on innovative cognitive test instruments It also provides insights to translate research knowledge into public policies in order to address socioeconomic issues And it does so from an international perspective dedicating a whole section to the cultural diversity of mathematics learning difficulties in different parts of the world All of this makes the International Handbook of Mathematical Learning Difficulties an essential tool for those involved in the daily struggle to prepare the future generations to succeed in the global knowledge society *Who's who in the South and Southwest* ,2005

Some Developments in Research in Science and Mathematics in Sub-Saharan Africa Lorna Holtman,2008 Much attention in late developing countries is given to providing access to studies which allow school leavers to enter science and technology related careers These programmes are driven by the belief that graduates will then substantially contribute to the developmental needs of their countries But is providing access to institutions enough Students in developing countries often come from school environments lacking in resources human physical and financial This book in a number of chapters reviews research related to the crucial dimension of epistemological access to the disciplines of import which students need as much as institutional access in order to improve their chances of success A significant feature of this collection s research studies is that their empirical bases are highly localised covering areas such as research methods access curriculum instruction and assessment and the relevance of science and mathematics education in Zimbabwe Uganda Swaziland South Africa Namibia Malawi Ghana and Lesotho This volume provides invaluable insights and will be of relevance to researchers policy makers and lecturers interested in these research outcomes in Sub Saharan Africa It is the outcome of a doctoral research capacity development project the Graduate Studies in Science Mathematics and Technology Education GRASSMATE **Curricula, Examinations, and Assessment in Secondary Education in Sub-Saharan Africa** World Bank,2008-02-15 Economic and social changes fast evolution of technology and the growing importance of Internet services and international communications all these require secondary education providers to adapt what is taught and learned in schools However in Africa the content of secondary curricula is in most cases ill adapted to 21st century challenges where young people are

mobile have access to more and instant information and face health threats such as HIV AIDS In addition implementation problems exist and the time for instruction is often much less than what is required by the prescribed secondary curriculum In Africa there is a need to develop a secondary education curriculum adapted to the local economic and social environment but with international comparable performance indicators This study analyzes that challenge the quality of curricula and assessment and their development processes in secondary education in Africa against the background of existing contexts conditions and ambitions on the one hand and current pedagogical thinking on the other This World Bank Working Paper was prepared as part of the Secondary Education and Training in Africa SEIA initiative which aims to assist countries to develop sustainable strategies for expansion and quality improvements in secondary education and training Cracking the code UNESCO,2017-09-04 This report aims to crack the code by deciphering the factors that hinder and facilitate girls and women's participation achievement and continuation in science technology engineering and mathematics STEM education and in particular what the education sector can do to promote girls and women's interest in and engagement with STEM education and ultimately STEM careers
