Biennial Report Kansas State Horticultural Society,1880 **Eureka** Chad Orzel,2014-12-09 When it comes to science too often people say I just don't have the brains for it and leave it at that Why is science so intimidating and why do people let themselves feel this way What makes one person a scientist and another disinclined even to learn how to read graphs The idea that scientists are people who wear lab coats and are somehow smarter than the rest of us is a common yet dangerous misconception that puts science on an intimidating pedestal How did science become so divorced from everyday experience In *Eureka* science popularizer Chad Orzel argues that even the people who are most forthright about hating science are doing science often without even knowing it Orzel shows that science is central to the human experience every human can think like a scientist and regularly does so in the course of everyday activities The common misconception is that science is a body of boring abstract often mathematical facts In truth science is a process Looking at the world Thinking about what makes it work Testing your mental model by comparing it to reality and Telling others about your results all things that people do daily By revealing the connection between the everyday activities that people do solving crossword puzzles playing sports or even watching mystery shows on television and the processes used to make great scientific discoveries *Eureka*
