Plant Growth-Promoting Microorganisms for Sustainable Agricultural Production Everlon Cid Rigobelo, Saveetha Kandasamy, Duraisamy Saravanakumar, 2022-04-18 *Le guide des masters, MS et MBA* Hobsons, 2007-02-08 Présentation de tous les 3e cycles préparés en France les Masters recherche ou professionnel MS DRT ou MBA qui aide l'étudiant faire son choix parmi les formations offertes après un bac 4 ou un bac 5 et lui donne toutes les pistes pour réussir son admission Intégre les fusions issues de la forme LMD **VIE ET MORT DES EPIDEMIES**, 2013 **Preventing and Treating Liver Diseases: Medicinal and Food Plants, their metabolites as potential options** Qinge Ma, Rongrui Wei, Zhipei Sang, Chunsu Yuan, Chunlei Zhang, 2025-03-28 Liver diseases are seriously endangering human health in the world In recent years the incidence rate of liver disease is increasing year by year and the age of patients tends to be younger Therefore it is urgent to find safe and effective drugs to treat liver diseases The drugs used to treat liver diseases in clinic are mainly liver protecting chemical drugs some chemical synthetic drugs have serious problems such as high toxicity high recurrence rate and high cost However medicinal and food plants have unique advantages in terms of safety and compliance which have always been an important source for finding new hepatoprotective drugs Importantly new hepatoprotective natural products discovered from medicinal and food plants have the advantages of multi pathways multi targets and safety which are focused on by medical researchers Therefore discovering safe and effective new hepatoprotective drugs from medicinal and food plants used anywhere in the world is a new research direction with important research value This research topic aims to address the following issues To discover hepatoprotective natural products from medicinal and food plants that can be used to treat liver diseases for people This will involve the development of protocols and approaches using modern technologies efficient systems and novel materials to achieve hepatoprotective drug discovery from medicinal and food plants Natural Compounds as Antimicrobial Agents Carlos M. Franco, Beatriz Vázquez Belda, 2020-12-02 The world is full of plants and animals that have their own defenses producing various substances in their daily fight against bacteria fungi or other agents These products are alternatives to conventional antimicrobials that have a poor reputation with consumers Many of these compounds are well known however the multiple types of structures together with the variable responses depending of the type of biocontrol needed in a wide range of applications such as clinical agricultural general hygiene and food necessitates the continuous search for specific applications and the continuous study of how to use these substances The present book provides a summary of reviews and original research works that explore the multiple alternatives for the use of these compounds *Les métiers de la biologie et des biotechnologies* Chloé Leprince, 2007 Tous les métiers en biologie De technicien de recherche chargé de veille en passant par professeur et oenologue conseil les auteurs présentent les formations les écoles les débouchés et les différents métiers du secteur Plasmids Marcelo E. Tolmasky, Juan C. Alonso, 2020-07-24 Explore the remarkable discoveries in the rapidly expanding field of plasmid biology Plasmids are integral to biological

research as models for innumerable mechanisms of living cells as tools for creating the most diverse therapies and as crucial helpers for understanding the dissemination of microbial populations Their role in virulence and antibiotic resistance together with the generalization of omics disciplines has recently ignited a new wave of interest in plasmids This comprehensive book contains a series of expertly written chapters focused on plasmid biology mechanistic details of plasmid function and the increased utilization of plasmids in biotechnology and pharmacology that has occurred in the past decade Plasmids Biology and Impact in Biotechnology and Discovery serves as an invaluable reference for researchers in the wide range of fields and disciplines that utilize plasmids and can also be used as a textbook for upper level undergraduate and graduate courses in biotechnology and molecular biology

Mutation Breeding for Sustainable Food Production and Climate Resilience Suprasanna Penna, S. Mohan Jain, 2023-04-04 This book highlights the recent progress on the applications of mutation breeding technology in crop plants Plant breeders and agriculturists are faced with the new challenges of climate change human population growth and dwindling arable land and water resources which threaten to sustain food production worldwide Genetic variation is the basis which plant breeders require to produce new and improved cultivars The understanding of mutation induction and exploring its applications has paved the way for enhancing genetic variability for various plant and agronomic characters and led to advances in gene discovery for various traits Induced mutagenesis has played a significant role in crop improvement and currently the technology has resulted in the development and release of more than 3600 mutant varieties in most of the crop plants with great economic impact The field of mutation breeding has come long way to become an important approach for crop improvement This book covers various methodologies of mutation induction screening of mutants genome editing and genomics advances and mutant gene discovery The book further discusses success stories in different countries and applications of mutation breeding in food crops horticultural plants and plantation crops This informative book is very useful to plant breeders students and researchers in the field of agriculture plant sciences food science and genetics

Mobile DNA III Michael Chandler, Martin Gellert, Alan M. Lambowitz, Phoebe A. Rice, Suzanne B. Sandmeyer, 2020-07-24 An exploration of the raw power of genetic material to refashion itself to any purpose Virtually all organisms contain multiple mobile DNAs that can move from place to place and in some organisms mobile DNA elements make up a significant portion of the genome Mobile DNA III provides a comprehensive review of recent research including findings suggesting the important role that mobile elements play in genome evolution and stability Editor in Chief Nancy L Craig assembled a team of multidisciplinary experts to develop this cutting edge resource that covers the specific molecular mechanisms involved in recombination including a detailed structural analysis of the enzymes responsible presents a detailed account of the many different recombination systems that can rearrange genomes examines the tremendous impact of mobile DNA in virtually all organisms Mobile DNA III is valuable as an in depth supplemental reading for upper level life sciences students and as a reference for investigators

exploring new biological systems Biomedical researchers will find documentation of recent advances in understanding immune antigen conflict between host and pathogen It introduces biotechnicians to amazing tools for in vivo control of designer DNAs It allows specialists to pick and choose advanced reviews of specific elements and to be drawn in by unexpected parallels and contrasts among the elements in diverse organisms Mobile DNA III provides the most lucid reviews of these complex topics available anywhere *Les bactéries, leur monde et nous* Janine Guespin-Michel, 2011-04-20 Et si on cherchait d'explorer les bactéries non pas en partant de ce que l'on pense qu'elles sont mais en partant de ce qui les produit tout instant donc de leurs interactions avec l'environnement En s'appuyant sur le monde bactérien qu'elle connaît bien Janine Guespin microbiologiste de renommée internationale livre des idées nouvelles sur un concept clé de la biologie moderne l'interaction entre gènes et environnement le hasard et la nécessité **National Library of Medicine Current Catalog** National Library of Medicine (U.S.), 1993 First multi year cumulation covers six years 1965-70 *Canadian Journal of Chemistry*, 2001 *Wastewater from Olive Oil Production* Salah Souabi, Abdelkader Anouzla, 2023-02-10 This book summarizes the recent research development concerning olive oil wastewater management characterization environmental impact recovery and treatment The book combines different chapters on the management of olive oil rejects using simple techniques with low investment and operating costs The main focus of the book is Diagnosis impacts of olive oil waste and regulations The valorization of the margins and the olive waste Wastewater treatment and recovery Evaluation of investments and operating costs of treatment techniques Shaped by experience the authors present their view and approach to each focus area of managing liquid and solid waste produced by crushing units **Translation Revisited** Mamadou Diawara, Elísio S. Macamo, Jean-Bernard Ouédraogo, 2019-01-17 How realistic is it to expect translation to render the world intelligible in a context shaped by different historical trajectories and experiences Can we rely on human universals to translate through the unique and specific webs of meaning that languages represent If knowledge production is a kind of translation then it is fair to assume that the possibility of translation has largely rested on the idea that Western experience is the repository of these human universals against the background of which different human experiences can be rendered intelligible The problem with this assumption however is that there are limits to Western claims to universalism mainly because these claims were at the service of the desire to justify imperial expansion This book addresses issues arising from these claims to universalism in the process of producing knowledge about diverse African social realities It shows that the idea of knowledge production as translation can be usefully deployed to inquire into how knowledge of Africa translates into an imperial attempt at changing local norms institutions and spiritual values Translation in this sense is the normalization of meanings issuing from a local historical experience claiming to be universal The task of producing knowledge of African social realities cannot be adequately addressed without a prior critical engagement with how translation has come to shape our ways of rendering Africa intelligible , **Functional Foods of the Future** Vijai Kumar Gupta, Minaxi Sharma, Smriti
