Novel Method for Measuring the Time of Death on Teeth - Based on Liquid Contents, Reflection Spectra and Colour André Hoffmann, 2004-05-25

Knowing about the time of death is often the central key to solving criminal cases. The time of death is also relevant in cases of natural death for the family register entry for the insurance system or the succession. However, the forensic medical estimation of the time of death postmortal interval is still not without limitations, especially if it should be precise or if it cannot be done relatively immediately after onset of death. With the onset of death, various processes begin to set in place that change a corpse and its tissues over the time axis. If it were possible to find a process in a certain tissue that would behave precisely like one or better several clockworks and if it were still possible to reset the time to the state before or at the time of death, if it would also be possible that these synchronous clocks run again and if it were also possible to run the elapsed time after death in real time on the identical individual to be examined or the identical examination object under comparable conditions, simulation, the perfect and most precise method for determining the time of death would be born. The author of the present work has observed that teeth of dead appear much brighter, differently coloured, and less translucent and more opaque than teeth of living people, and that dental colour changes are based on reversible drying and liquid absorption processes and can be measured with high precision and very differentiated values. He revealed phenomena, paradoxes, dynamics, and liquid flow and articulates the dental fingerprint for identification: tooth clock, tooth memory. He measures the loss of liquid in ranges of up to one millionth of a gram in the microgram range, as well as the colour and reflection spectra with high precision measuring systems, and he sees a fundamental possibility in the use of processes that he has measured and analyzed on drying and liquid absorbing teeth, and he is presenting a novel method for the first time. Furthermore, for the first time, he also presents a reference independent approach, perhaps the first reference independent analysis or measurement method in the natural sciences based on drying up to the time of the first measurement, liquid storage, and repeated drying, the actual simulation. For this reference independent method approach, in contrast to his reference dependent method, it does not necessarily need reference values, i.e., values that had to be obtained beforehand on other comparable samples, see nomogram, but only values that were obtained previously on the identical object. For the first time, the scattering problem was circumvented, the way to a high precision method. The novel method of analyzing and measuring the time of death seems to have a number of advantages: objectifying measurement instead of subjective estimations of stages; several independent values such as L, a, b, C, h, M spectral values instead of just one numerical value; temperature in degrees in the case of the body cooling method; reversibility instead of irreversibility of the processes; and thus, after sufficient liquid storage, repeatability of the post mortem conditions and consequently the post mortem interval up to the first measurement in the context of a simulation under comparable conditions on the identical object and thus avoidance of the scattering problem, avoidance of intra and inter individual differences on both sides of the autopsy table for

the estimating and for the estimated individual time of death measurement on site or high precision measurements with high precision positioning systems instead of measurement with thermometers in the author's vision comfortable measurements of various samples independently of one another within an automatic analyzer simulating ambient conditions in the laboratory instead. A breakthrough Konica Minolta, 2003 **Systematic Research and Analysis of the Tooth Colour** André Hoffmann, 2005-10-31. André Hoffmann, innovator, researcher and developer, pioneer in the field of optical technologies, photonics, systematically researched the tooth colour and its origin with highest precision. See publication in 2000. This book shows an excerpt of this systematic original research at human teeth and dental shade guides with high precision measuring systems and high precision positioning system in vitro. Due to his basic scientific research, he was able to quantify and isolate manifold factors influencing the colour of teeth. These include, for example, the light or measuring light and the type of light illuminant and illumination and colour temperature, the optical beam path of the light or the measuring geometry, the observation angle, the size of the measuring surface and measuring opening, the gloss, the liquid content, with scientific evidence of the relationship between liquid content and tooth colour, effect of drying, moisture and rehydration, the correlation between the liquid content and the gloss effect, the subjectivity of visual shade matching, crown curvature, type of system, spectrophotometer, tristimulus colorimeter, measuring mode, contact or non-contact system, object relation, positioning, repeatability or reproducibility, lens shift, displacement between sample and measuring surface, and further intra- and interindividual factors. In addition, subjective visual determinations and objectified measurements were examined in subjective/objective comparisons using colour coordinates comparisons. All these influencing factors are investigated on moist, drying, drier, various specific dehydration and rehydration states, and dry teeth based on the brightness L, on colour measurement values such as a, b, CIELAB, C, h, CIELCH, E, on the metamerism index, on spectral values and curves, tabs of dental shade guides, and on tooth colour spaces. As part of this exploration, phenomena, e.g. changes and breaks in behaviour, as well as highly individual developments in colour values, paradoxes between the values of subjective determination using shade guides and the values of objective measurements were identified, and insights into the very complex colour dynamics through dehydration and rehydration were shown up to more than 8 days. The development of the individual colour measurement values was based on the liquid flow through the tooth and its tissues, in particular during drying and rehydration, and gave information about dynamics and the temporal extent of these processes. On the basis of this data, Hoffmann had developed several methods for research and practice, suggestions for feasible innovations, such as monitoring of dental treatment to protect against pulp damage based on drying and reconstructing the colour of naturally moist teeth on those that have already dried, the identification of the living and the dead human and animals via the dental fingerprint, and a novel method of measuring the time of death for forensic medicine. He also described a time limit of drying up to which relatively natural, suitable colour values and shade matching results can be obtained and after which no colour determination

should be carried out and he established the rehydration time after the end of the drying or dental treatment which must be waited in order to regain a natural tooth colour and to get correct values and results again His findings also show that teeth are able to store information on for example the condition liquid content colour values and the time within the drying and liquid re absorption chronology The author articulates a dental chronometer tooth clock dental data store tooth data store and a dental memory tooth memory and believes that significant progress in this field may include and could be achieved via a neural network for colour measurement apparatus A book for anyone interested in the natural sciences *The Complete Guide to Sony's Alpha 700 DSLR (B&W Edition)* Gary Friedman, *Popular Photography* ,1983-07 *Popular Photography* ,1983-01 *Computer and Computing Technologies in Agriculture II, Volume 1* Daoliang Li, Chunjiang Zhao, 2009-06-12 The papers in this volume comprise the refereed proceedings of the Second IFIP International Conference on Computer and Computing Technologies in Agriculture CCTA2008 in Beijing China 2008 The conference on the Second IFIP International Conference on Computer and Computing Technologies in Agriculture CCTA 2008 is cooperatively sponsored and organized by the China Agricultural University CAU the National Engineering Research Center for Information Technology in Agriculture NERCITA the Chinese Society of Agricultural Engineering CSAE International Federation for Information Processing IFIP Beijing Society for Information Technology in Agriculture China and Beijing Research Center for Agro products Test and Farmland Inspection China The related departments of China s central government bodies like Ministry of Science and Technology Ministry of Industry and Information Technology Ministry of Education and the Beijing Municipal Natural Science Foundation Beijing Academy of Agricultural and Forestry Sciences etc have greatly contributed and supported to this event The conference is as good platform to bring together scientists and researchers agronomists and information engineers extension servers and entrepreneurs from a range of disciplines concerned with impact of Information technology for sustainable agriculture and rural development The representatives of all the supporting organizations a group of invited speakers experts and researchers from more than 15 countries such as the Netherlands Spain Portugal Mexico Germany Greece Australia Estonia Japan Korea India Iran Nigeria Brazil China etc *Konica Minolta* ,2005 **Popular Photography** ,2005-09 *Popular Photography* ,1982-03 **Popular Photography** ,1984 **The Performance of Concentrated Solar Power (CSP) Systems** Peter Heller, 2017-05-15 The Performance of Concentrated Solar Power CSP Systems Analysis Measurement and Assessment offers a unique overview of the information on the state of the art of analysis measurement and assessment of the performance of concentrated solar power CSP components and systems in a comprehensive compact and complete manner Following an introductory chapter to CSP systems and the fundamental principles of performance assessment individual chapters explore the component performance of mirrors and receivers Further expert written chapters look at system performance assessment durability testing and solar resource forecasting for CSP systems A final chapter gives an outlook on the actual methods and instruments for performance and durability

a review on magneto caloric materials for room temperature - Mar 04 2022

web mar 31 2020 the magneto caloric effect is the change in temperature of a magnetic material when that material is either magnetized demagnetized adiabatically this review is focused on the selection of a

magnetocaloric effect mce magnotherm - Apr 05 2022

web the magnetocaloric effect mce manifests itself as a change of thermodynamic state of a magnetic material in an external alternating magnetic field h depending on the conditions isothermal or adiabatic under which the magnetic field h is applied either the isothermal entropy change ΔS or the adiabatic temperature change ΔT_{ad} are commonly

magnetocaloric effect from materials research to sciencedirect - Feb 15 2023

web apr 1 2018 magnetocaloric effect from materials research to refrigeration devices sciencedirect volume 93 april 2018 pages 112 232 magnetocaloric effect from materials research to refrigeration devices v franco j s blázquez j j ipus j y law l m moreno ramírez a conde add to mendeley

ultralow field magnetocaloric materials for compact magnetic - May 06 2022

web jul 21 2023 the magnetocaloric effect mce is known as the thermal response of a magnetic material to changes in external magnetic fields in the vicinity of a magnetic phase transition external magnetic

magnetocaloric materials the search for new systems - May 18 2023

web sep 1 2012 this comparison demonstrates the potential for new magnetocaloric material systems to be established through structural control and optimization at the atomic nano and microscales

caloric materials for cooling and heating science - Jul 08 2022

web nov 13 2020 magnetically driven thermal changes in magnetocaloric materials have for several decades been exploited to pump heat near room temperature by contrast their electrocaloric and mechanocaloric counterparts have only been intensively studied and exploited for little more than a decade

recent progresses in exploring magnetocaloric materials arxiv org - Aug 09 2022

web recent progress in exploring magnetocaloric materials b g shen j r sun f x hu h w zhang and z h cheng state key laboratory for magnetism institute of physics chinese academy of sciences beijing 100190 china abstract magnetic refrigeration based on the magnetocaloric effect mce of materials is a potential technique

magnetocaloric effect an overview sciencedirect topics - Sep 10 2022

web magnetocaloric effect mce is a heating or cooling of a magnetic material when the applied magnetic field changes at the heart of the mces lays coupling between the magnetic moments and external magnetic field and in some cases the mce involves structural transitions concomitant with magnetic transitions

current perspective in magnetocaloric materials research - Jan 14 2023

web jan 27 2023 magnetocaloric materials nowadays since the discovery of gmce in gd₅si₂ge₂ the search for

magnetocaloric materials has primarily focused on fomt materials however there are still ongoing efforts for somt materials due to their non hysteretic advantage and effective performance at low temperatures

magnetic refrigeration wikipedia - Oct 23 2023

web magnetic refrigeration is a cooling technology based on the magnetocaloric effect this technique can be used to attain extremely low temperatures as well as the ranges used in common refrigerators a magnetocaloric material warms up when a

review on magnetocaloric effect and materials springerlink - Oct 11 2022

web apr 3 2018 this review paper deals with all kinds of magnetocaloric materials such as ferromagnetic perovskites glass ceramics oxide based composites and spinel ferrites the comparative study of magnetocaloric properties revealed that manganites have the potential applications in magnetorefrigeration technology

magnetic refrigeration material operating at a full nature - Mar 16 2023

web mar 31 2022 introduction magnetic materials undergo isothermal magnetic entropy changes Δs_m or adiabatic temperature changes ΔT_{ad} upon the application or removal of an external magnetic field this

magnetocaloric materials and applications springerlink - Apr 17 2023

web apr 30 2021 the physics of magnetocaloric pyromagnetic and spin seebeck effects in magnetic materials is presented all are magnetothermal effects that can be used in a range of cooling power generation or spintronic devices the focus is

magnetocaloric materials from micro to nanoscale - Aug 21 2023

web jan 1 2019 in this review the goal is to give the reader a general overview of the miniaturization from micro to nanoscale of different structures microparticles nanoparticles nanowires nanorods and thin films of the most important magnetocaloric materials families

energy applications of magnetocaloric materials kitanovski - Jul 20 2023

web magnetocaloric materials are of two types based on the order of the phase transition between the ferromagnetic and paramagnetic states namely first order magnetocaloric fomt materials which undergo discontinuous change in magnetization with changing temperature and second order magnetocaloric somt materials which undergo

high efficiency magnetic refrigeration using holmium nature - Jun 07 2022

web feb 19 2021 magnetic refrigeration mr is a method of cooling matter using a magnetic field traditionally it has been studied for use in refrigeration near room temperature however recently mr research

magnetocaloric materials annual review of materials research - Dec 13 2022

web magnetocaloric materials annual review of materials science vol 30 387 429 volume publication date august 2000 doi org 10 1146 annurev matsci 30 1 387 k a gschnidner jr v k pecharsky ames laboratory and department of materials science and engineering iowa state university ames iowa 50011 3020 e mail

introduction to magnetic refrigeration magnetocaloric materials - Nov 12 2022

web feb 28 2023 1 introduction according to the 20th information note of the iir on refrigeration techniques 2007 it is possible to replace hfc refrigerants by magnetocaloric alloys harmless to the environment by using magnetic refrigeration at room temperature

advanced materials for magnetic cooling milliporesigma - Jun 19 2023

web the standard magnetocaloric material gd for near room temperature applications the rare earth metal gd is the benchmark magnetic refrigerant material it exhibits excellent magnetocaloric properties that are difficult to improve upon

magnetocaloric material calorivac vac - Sep 22 2023

web product details different machines for energy conversion are possible refrigeration and air conditioning devices mechanical energy required to turn a magnet is used to pump heat from a lower temperature level to a higher temperature
