The set of six volumes covers over 2500 years of history, charting the evolving nature and role of peace throughout history. This volume, A Cultural History of Peace in the Modern Age, explores peace in the period from 1920 to the present. As with all the volumes in the illustrated Cultural History of Peace set, this volume presents essays on the meaning of peace, peace movements, maintaining peace, peace in relation to gender, religion, and war, and representations of peace. A Cultural History of Peace in the Modern Age is the most authoritative and comprehensive survey available on peace in the twentieth and twenty-first century. **Intractable Conflicts** Daniel Bar-Tal, 2013-03-18 This book provides a comprehensive interdisciplinary and holistic analysis of the socio-psychological dynamics of intractable conflicts. Daniel Bar-Tal's original conceptual framework is supported by evidence drawn from different disciplines, including empirical data and illustrative case studies. His analysis rests on the premise that intractable conflicts share certain socio-psychological foundations despite differences in context and other characteristics. He describes a full cycle of intractable conflicts: their outbreak, escalation, and reconciliation through peace building. Bar-Tal's framework provides a broad theoretical view of the socio-psychological repertoire that develops in the course of long-term and violent conflicts, outlines the factors affecting its formation, demonstrates how it is maintained, points out its functions, and describes its consequences. The book also elaborates on the contents, processes, and other factors involved in the peace building process. *Psychological Components of Sustainable Peace* Peter T. Coleman, Morton Deutsch, 2012-06-15

Scholarship on the psychology of peace has been accumulating for decades. The approach employed has been predominantly centered on addressing and preventing conflict and violence and less on the conditions associated with promoting peace. Concerns around nuclear annihilation, enemy images, discrimination, denial of basic human needs, terrorism and torture have been the focal points of most research. The Psychological Components of a Sustainable Peace moves beyond a prevention orientation to the study of the conditions for increasing the probabilities for sustainable cooperative peace. Such a view combines preventative scholarship with a promotive orientation to the study of peaceful situations and societies. The contributors to this volume examine the components of various psychological theories that contribute to the promotion of a harmonious sustainable peace. Underlying this orientation is the belief that promoting the ideas and actions which can lead to a sustainable harmonious peace will not only contribute to the prevention of war but will also lead to more positive constructive relations among people and nations and to a more sustainable planet. The Psychological Components of a Sustainable Peace is valuable and stimulating reading for researchers in peace psychology, political psychology and conflict resolution as well as others who are interested in developing a sustainable harmonious world.

**SDG18 Communication for All, Volume 1** Jan Servaes, Muhammad Jameel Yusha'u, 2023-03-25. The 2030 agenda for development or what is known as the Sustainable Development Goals (SDGs) is the most ambitious agenda collectively agreed upon by 193 countries in human history. In 2015 the UN Member States adopted the 17 SDGs as a framework that would help address the challenges being faced by humanity. From eradicating poverty, ending hunger, providing universal access to healthcare and education and addressing climate change to the partnering of individuals, communities and nation states to achieve global goals. Yet the framers of the 2030 agenda forgot to dedicate one goal focused on the role of communication in achieving the SDGs. It is nearly impossible to achieve the SDGs without the articulation and embrace of the role of communication in development. Today development has become a communication issue and communication is a development issue. How could such a vital pillar of life be missing in the UN's Sustainable Development Goals? Volume 1 provides an overview of what the contributors have termed as the missing link between existing SDGs: Communication for All.

Psychology as a Dialogical Science Maria Cláudia Santos Lopes-de-Oliveira, Angela Uchoa Branco, Sandra Ferraz Dourado Castillo Freire, 2020-05-14. This book intends to translate into theoretical, methodological and practical language the principles of dialogical psychology. Throughout the 19th and 20th centuries, theoretical models in psychology have approached human mind and behavior from a monological point of view, a generalizing perspective which ignored the core role of social transactions in the construction of the person and sought to explain psychological functioning only looking inside individuals' minds and brains or in mechanistic sets of reinforcement contingencies. However, for the last 40 years, critical perspectives within the fields of psychological and sociological theoretical thinking have produced an important epistemological shift towards a new dialogical paradigm within the behavioral and social sciences. The contributions in this volume intend to present both the theoretical framework and

possible applications of dialogical psychology in different fields of research and practice such as Developmental psychology School and educational psychology Social and personality psychology Education Social work Anthropology Art Psychology as a Dialogical Science Self and Culture Mutual Development will be an invaluable resource to both researchers and practitioners working in the different areas involved in the study and promotion of healthy human development by providing an alternative scientific framework to help overcome the traditional reductionist monological explanations of psychological phenomena **The Psychology of Peace Promotion** Mary Gloria C. Njoku, Leonard A. Jason, R. Burke Johnson, 2019-07-04

This volume Psychology of Peace Promotion builds on previous volumes of peace psychology extending its contributions by drawing from peace research and practices from five continents Africa Asia Europe North America and South America The book discusses emerging disciplinary and inter disciplinary theories and actions Each chapter begins with a theoretical framework for understanding peace followed by a critical review of peace promotion in a specific setting and concludes with an illustration of psychological principles or theories in either a narrative format or an empirical investigation This volume develops as well as guides its readers on the epistemology of promoting and sustaining peace in varied settings around the world This book presents relevant cutting edge peace promotion strategies to anyone interested in promoting peace more effectively including peace practitioners scholars teachers and researchers as well as the general reader It presents a number of innovative approaches illustrating their applications to specific social problems settings and populations In addition this volume has much in store for both academic and practice based scientists in the field of peace psychology mental health professionals administrators educators and graduate students from various disciplines The goal is the promotion and sustenance of peace using theoretically sound yet innovative and creative approaches As expressed by the United Nations Secretary peace does not occur by happenstance Promoting and sustaining peace requires reflective thoughtful and targeted efforts This book inspires its readers to develop a better understanding of peace and the means of promoting peace in a sustainable way Research Anthology on Modern Violence and Its Impact on Society Management Association,
