Hanging with the Elephant Michael Harding, 2014-09-18 A compelling memoir Absorbing and graced with a deceptive lightness of touch *Hanging with the Elephant* is clever and brilliantly pieced together Harding writes like an angel Sunday Times From the No 1 bestselling author of *Staring at Lakes Talking to Strangers* and *On Tuesdays I'm a Buddhist* In public or on stage it's different I'm fine I have no bother talking to three hundred people and sharing my feelings But when I'm in a room on a one to one basis I get lost I can never find the right word Except for that phrase hold me

Michael Harding's wife has departed for a six week trip and he has been left alone in their home in Leitrim Faced with the realities of caring for himself for the first time since his illness two years before Harding endeavours to tame the elephant an Asian metaphor for the unruly mind As he does he finds himself finally coming to terms with the death of his mother a loss that has changed him more than he knows Funny searingly honest and profound *Hanging with the Elephant* pulls back the curtain and reveals what it is really like to be alive

Tennessee Shane S. Simmons, 2016-08-08 Author Shane Simmons explores tales of bravery lore and bizarre customs within the East Tennessee region The mountains of East Tennessee are chock full of unique folklore passed down through generations Locals spin age old yarns of legends like Davy Crockett Daniel Boone and Dragging Canoe Stories of snake handling churches and the myths behind the death crown superstitions dot the landscape The mysteries surrounding the Sensabaugh Tunnel still haunt residents Ontolinguistics Andrea C. Schalley, Dietmar Zaefferer, 2008-08-22 Current progress in linguistic theorizing is more and more informed by cross linguistic including cross modal investigation Comparison of languages relies crucially on the concepts that can be coded with similar effort in all languages These concepts are part of every language user's ontology the network of cross connected conceptualizations the mind uses in

coping with the world Assuming that language comparability is rooted in the comparability of user ontologies the idea of the present volume is to further instigate progress in linguistics by looking behind the interface with the conceptual intentional system and asking a still underexplored question How are ontological structures reflected in intra and cross linguistic regularities This question defines the research program of ontology based linguistics or ontolinguistics Recent advances in the theory of language have been characterized by an emphasis on external explanatory adequacy and thus on relating language to other phenomena The research program introduced in this volume adds a decisively distinct and fresh aspect to this emerging new contextualization of the field by bringing together insights from different areas mainly linguistics but also neuroscience philosophy and artificial intelligence In providing these disciplines with a new common task the exploration of the impact of ontological structures on linguistic regularities the ontolinguistic approach promises to develop into a vital branch of cognitive science Documenting the beginnings the book aims to instigate future interdisciplinary research in this area It will be of interest to researchers in linguistics artificial intelligence philosophy and cognitive science in general
