Teacher's Edition*, 1978 **Discovering Structure in Algebra** Foster Earl Grossnickle, 1962 **Discovering Mathematics with Magma** Wieb Bosma, John Cannon, 2007-07-10 The appearance of this volume celebrates the first decade of Magma a new computer algebra system launched at the First Magma Conference on Computational Algebra held at Queen Mary and Westfield College London August 1993 This book introduces the reader to the role Magma plays in advanced mathematical research Each paper examines how the computer can be used to gain insight into either a single problem or a small group of closely related problems The intention is to present sufficient detail so that a reader can gain insight into the mathematical questions that are the origin of the problems and develop an understanding as to how such computations are specified in Magma It is hoped that the reader will come to a realisation of the important role that computational algebra can play in mathematical research Readers not primarily interested in using Magma will easily acquire the skills needed to undertake basic programming in Magma while experienced Magma users can learn both mathematics and advanced computational methods in areas related to their own The core of the volume comprises 14 papers The authors were invited to submit articles on designated topics and these articles were then reviewed by referees Although by no means exhaustive the topics range over a considerable part of Magma's coverage of algorithmic algebra from number theory and algebraic geometry via representation theory and computational group theory to some branches of discrete mathematics and graph theory The papers are preceded by an outline of the Magma project a brief summary of the papers and some instructions on reading the Magma code A basic introduction to the Magma language is given in an appendix The editors express their gratitude to the contributors to this volume both for the work put into producing the papers and for their patience **Electro-technology**, 1961 **Scripta Mathematica**, 1961 The Cumulative Book Index, 1995 A world list of books in the English language Cumulated Index to the Books, 1915 *Whitaker's Cumulative Book List*, 1974 **Whitaker's Five-year Cumulative Book List**, 1968 **Introduction to the Calculus** Arnold Dresden, 1940 *Catalog of Copyright Entries.
