*Unsolved Problems in Ecology* Andrew Dobson, David Tilman, Robert D. Holt, 2020-06-02 This volume provides a series of essays on open questions in ecology with the overarching goal being to outline the most important most interesting or most fundamental problems in ecology that need to be addressed The contributions span ecological subfields from behavioral ecology and population ecology to disease ecology and conservation and range in tone from the technical to more personal meditations on the state of the field Many of the chapters start or end in moments of genuine curiosity like one which takes up the question of why the world is green or another which asks what might come of a thought experiment in which we turn off evolution entirely

**T: The Story of Testosterone, the Hormone that Dominates and Divides Us** Carole Hooven, 2021-07-13 Through riveting personal stories and the latest research Harvard evolutionary biologist Carole Hooven shows how testosterone drives the behavior of the sexes apart and how understanding the science behind this hormone is empowering for all Since antiquity from the eunuchs in the royal courts of ancient China to the booming market for elixirs of youth in nineteenth century Europe humans have understood that typically masculine behavior depends on testicles the main source of testosterone in males Which sex

has the highest rates of physical violence hunger for status and desire for a high number of sex partners Just follow the testosterone Although we humans can study and reflect on our own behavior we are also animals the products of millions of years of evolution Fascinating research on creatures from chimpanzees to spiny lizards shows how high testosterone helps males out reproduce their competitors And men are no exception While most people agree that sex differences in human behavior exist they disagree about the reasons But the science is clear testosterone is a potent force in human society driving the bodies and behavior of the sexes apart But as Hooven shows in T it does so in concert with genes and culture to produce a vast variety of male and female behavior And crucially the fact that many sex differences are grounded in biology provides no support for restrictive gender norms or patriarchal values In understanding testosterone we better understand ourselves and one another and how we might build a fairer safer society

*Ecoacoustics* Almo Farina, Stuart H. Gage, 2017-05-22 The sounds produced by geophonic biophonic and technophonic sources are relevant to the function of natural and human modified ecosystems Passive recording is one of the most non invasive technologies as its use avoids human intrusion during acoustic surveys and facilitates the accumulation of huge amounts of acoustical data For the first time this book collates and reviews the science behind ecoacoustics illustrating the principles methods and applications of this exciting new field Topics covered in this comprehensive volume include the assessment of biodiversity based on sounds emanating from a variety of environments the best technologies and methods necessary to investigate environmental sounds implications for climate change and urban systems the relationship between landscape ecology and ecoacoustics the conservation of soundscapes and the social value of ecoacoustics areas of potential future research An invaluable resource for scholars researchers and students *Ecoacoustics The Ecological Role of Sounds* provides an unrivalled set of ideas tools and references based on the current state of the field
