I want to know if my dogs will eat faster if I add carrots or apples to my dog's kibble. I think that if I add apples to their kibbles, the dogs will eat the food the quickest. I will feed them 2 cups of food twice every day, for three months. I will also feed them in the same bowls, in the same location, and at the same time every day. One month I will feed them just kibble with nothing added into it, the next month I will feed them kibble and carrots, and the third month I will feed them kibble and apples. No matter what I add to the kibbles, the total amount of food will still be 2 cups. I will measure how fast they are eating their food to determine if putting carrots or apples in their food makes them eat faster.
