In the mid 1980s the International Commission on Mathematical Instruction ICMI inaugurated a series of studies in mathematics education by commissioning one on the influence of technology and informatics on mathematics and its teaching. These studies are designed to thoroughly explore topics of current temporary interest by gathering together a group of experts who prepare a Study Volume that provides a considered assessment of the current state and a guide to further developments. Studies have embraced a range of issues some central such as the teaching of algebra some closely related such as the impact of history and psychology and some looking at mathematics education from a particular perspective such as cultural differences between East and West. These studies have been commissioned at the rate of about one per year. Once the ICMI Executive decides on the topic one or two chairs are selected and then in consultation with them an International Program Committee IPC of about 12 experts is formed. The IPC then meets and prepares a Discussion Document that sets forth the issues and invites interested parties to submit papers. These papers are the basis for invitations to a Study Conference at which the various dimensions of the topic are explored and a book the Study Volume is sketched out. The book is then put together in collaboration mainly using electronic communication. The entire process typically takes about six years.

Algebra 1, Grade 9 Practice Workbook Hrw, 2003 *Metaphors We Teach By* Dr. Ken Badley, Harro Walter Van Brummelen, 2012-06-01

Metaphors We Teach By helps teachers reflect on how the metaphors they use to think about education shape what happens in their classrooms and in their schools. Teaching and learning will differ in classrooms whose teachers think of students as plants to be nurtured from those who consider them as clay to be molded. Students will be assessed differently if teachers think of assessment as a blessing and as justice instead of as measurement. This volume examines dozens of such metaphors related to teaching and teachers learning and learners curriculum assessment gender and matters of spirituality and faith. The book challenges teachers to embrace metaphors that fit their worldview and will improve teaching and learning in their classrooms.
