From Net Neutrality to ICT Neutrality
Patrick Maillé, Bruno Tuffin, 2022-11-05 This book discusses the pros and cons of information and communication ICT neutrality It tries to be as objective as possible from arguments of proponents and opponents this way enabling readers to build their own opinion It presents the history of the ongoing network neutrality debate the various concepts it encompasses and also some mathematical developments illustrating optimal strategies and potential counter intuitive results then extends the discussion to connected ICT domains The book thus touches issues related to history economics law networking and mathematics After an introductory chapter on the history of the topic chapter 2 surveys and compares the various laws in place worldwide and discusses some implications of heterogeneous rules in several regions Next chapter 3 details the arguments put forward by the participants of the net neutrality debate Chapter 4 then presents how the impact of neutral or non neutral behaviors can be analyzed mathematically with sometimes counter intuitive results and emphasizes the interest of modeling to avoid bad decisions Chapter 5 illustrates that content providers may not always be on the pro neutrality side as there are situations where they may have an economic advantage with a non neutral situation e g when they are leaders on a market and create barriers to entry for competitors Another related issue is covered in chapter 6 which discusses existing ways for ISPs to circumvent the packet based rules and behave non neutral without breaking the written law Chapter 7 gives more insight on the role and possible non neutral behavior of search engines leading to another debate called the search neutrality debate Chapter 8 focuses on e commerce platforms and social networks and investigates how they can influence users actions and opinions The issue is linked to the debate on the transparency of algorithms which is active in Europe especially Chapter 9 focuses on enforcing neutrality in practice through measurements indeed setting rules requires monitoring the activity of ICT actors in order to sanction non appropriate behaviors and be proactive against new

conducts The chapter explains why this is challenging and what tools are currently available Eventually Chapter 10 briefly concludes the presentation and opens the debate
