

River Art Activity

You will need

- a drawing board or flat surface
- soft pencils: brown, green, light blue, dark blue, turquoise, black, pink, grey, turquoise
- 1 sheet of paper (or a large sheet)
- a plastic bag or 1 painted paper
- masking tape or other tape

Soft pencils produce vibrant colors. They can be blended and layered to make a picture look like it has texture and depth. Follow these steps to make a picture of a boat reflecting in the water. We will use soft pencils to capture the true beauty of rippling water.

First, prepare your paper by taping it to a drawing board or flat surface. Use white tape or masking tape to do this. Keep your tape as straight as possible – this will create a border for your artwork.

Tip: If you're using masking tape, try making it to a different surface first to ensure it's allowed before using it on your paper.

Refer to the boat photo continuously while creating your artwork. Begin by blending in more colors: brown for the boat and its reflection, ochre, green and light and dark blue for the water. Add your pencil on to add to each more color.

to wider appreciation of Oceanic heritage and visual culture *Wyland: 25 Years at Sea* The Wyland Foundation, John Yow, 2006-09-01 Out of the earth's 6 billion people we probably have 5.9 billion to go but that's the goal I'd like nothing better than to have 6 billion people talking and thinking about protecting our planet and I see no reason to stop trying. Wyland Muralists naturally think big. But Wyland, arguably the world's best known marine painter whose images span thousands of square feet of walls, canvases and sculpted forms, makes an impact far beyond the art world. Wyland combines his incredible talents with those of a dedicated team of educators, scientists and environmentalists to truly change the way we view the planet. *Wyland 25 Years at Sea* opens the door to Wyland's fascinating world of art and its power to make a difference in the earth's future. Through its pages we experience the wonder of nature as seen through the eyes of this extraordinary artist while deepening our understanding of the importance of our environment and all creatures that share it. Like an artist's palette, this book mixes Wyland's breathtaking work with a narrative that reveals the man's personal world and his commitment to the earth. Woven throughout the whales, sea turtles and ocean waves is the absorbing story of how Wyland grew from his Detroit roots to become a successful fine artist to his mission today of delivering a lasting worldwide message of concern, hope and needed action. *Drawing Water* Tania Kovats, Fiona Bradley, 2014 Drawing both her own and other people's is a key part of Kovats' practice. In 2007 she wrote *The Drawing Book* Black Dog 2007 and she has long been interested in what drawing can do. For her exhibition at The Fruitmarket Gallery she has made a new book. Believing that drawing is a mechanism for exploration as much as a tool for representation, Kovats brings together in the book drawings by map makers, writers, shipbuilders, whalers, soldiers, sailors, artists, archaeologists, cartographers, scientists, urbanographers, engineers and dreamers, a diverse selection united by the sense that in making the drawing they were looking for something. A selection of Kovats' own drawing and writing anchors the book which attempts to construct in the artist's words a portolan, a chart drawn at sea to guide a sailor from one safe harbour to the next. ***Prospecting Ocean*** Stefanie Hessler, 2019-12-17 Investigating the entanglement of industry, politics, culture and economics at the frontier of ocean excavations through an innovative union of art and science. The oceans are crucial to the planet's well-being. They help regulate the global carbon cycle, support the resilience of ecosystems and provide livelihoods for communities. The oceans as guardians of planetary health are threatened by many forces, including growing extractivist practices. Through the innovative lens of artistic research, *Prospecting Ocean* investigates the entanglement of industry, politics, culture and economics at the frontier of ocean excavation. The result is a richly illustrated study that unites science and art to examine the ecological, cultural, philosophical and aesthetic reverberations of this current threat to the oceans. *Prospecting Oceans* takes as its starting point an exhibition by the photographer and filmmaker Armin Linke which was commissioned by TBA21 Academy London and first shown at the Institute of Marine Science CNR ISMAR in Venice. Linke is concerned with making the invisible visible and here he unmasks the technologies that enable extractions from the ocean, including future seabed mining for minerals and sampling of genetic

data But the book extends far beyond Linke s research presenting the latest research from a variety of fields and employing art as the place where disciplines can converge Integrating the work of artists with scientific theoretical and philosophical analysis Prospecting Ocean demonstrates that visual culture offers new and urgent perspectives on ecological crises
