

GENERAL

The IMC LonTalk® module allows communication between the Lennox IMC M1-7 (version 5.02 and higher) or M1-8 controller and a LonWorks® network. The module translates input and output variables between the Lennox protocol and the LonTalk® protocol.

The IMC LonTalk® Module has been developed to communicate with building automation systems. The functional profiles are proprietary in content and will require the integrator to use the datapoint information included in this manual.

A Lennox zone sensor or a LonTalk® network zone sensor may be used to send the zone temperature to the IMC.
