Rana,2009-08-18 GECON Grid Economics and Business Models Cloud computing is seen by many people as the natural evolution of Grid computing concepts Both for instance rely on the use of service based approaches for provisioning compute and data resources The importance of understanding business models and the economics of distributed computing systems and services has generally remained unchanged in the move to Cloud computing This understanding is necessary in order to build sustainable infrastructure and businesses around this paradigm of sharing Cloud services Currently only a handful of companies have created successful businesses around Cloud services Among these Amazon and Salesforce with their offerings of Elastic Compute Cloud and force.com among other offerings are the most prominent Both companies understand how to charge for their services and how to enable commercial transactions on them However whether a wide spread adoption of Cloud services will occur has to be seen One key enabler remains the ability to support suitable business models and charging schemes that appeal to users outsourcing part of their internal business functions The topics that have been addressed by the authors of accepted papers reflect the above described situation and the need for a better understanding of Grid economics The topics range from market mechanisms for trading computing resources capacity planning tools for modeling economic

aspects of service oriented systems architectures for handling service level agreements to models for economically efficient resource allocation

Wide Wiretap International Brand Management of Chinese Companies Sandra Bell, 2008-03-29 China is certainly doing its best to keep the world mesmerized by its economic achievements The Chinese economic growth story that begun 30 years ago has in terms of dynamics and duration long since surpassed all those economic miracles which have brought Germany Japan and the South East Asian Tigers into the top league of the industrialized world The rapid expansion of the Chinese economy has gone along with a fledgling re integration of China into the global economic system In the course of the last 30 years China has become a major player in the global economy and today is on a trajectory towards even greater prominence In recent years the Chinese economy seems to have reached an important threshold line of economic development and global integration In the first quarter century of reform and global opening Chinese enterprises have been largely confined to a passive role in the global division of labor Foreign enterprises as the proprietors of greatly superior business models production technologies management models as well as very competitively established brands have been integrating Chinese players in their value chains and global operations Lacking the necessary production technologies products as well as marketing knowledge to successfully address OECD consumers Chinese enterprises have been hardly able to enter the global markets without such guidance Now this constellation is changing
