Susan Bethany Reviewer Midwest Book Review **The Politics of Childhoods Real and Imagined** Priscilla Alderson, 2015-11-23 The second volume of Priscilla Alderson's popular and renowned book *Childhoods Real and Imagined* relates dialectical critical realism to childhood By demonstrating their relevance and value to each other Alderson presents a practical introductory guide for applying critical realism to research about children and young people Each chapter summarises key themes from several academic disciplines and policy areas ranging from climate change and social justice between generations to neoliberalism social reform and imagining utopias Children's and adults' views and experiences are reviewed and whereas the first volume deals with more personal and local aspects of childhood this volume widens the scope into debates about global politics which so seldom mention children Each chapter demonstrates how children and young people are an integral part of the whole of society and are often especially affected by policies and events This book is written for everyone who is researching studying or teaching about childhood or who cares for and works with children and young people as well as those interested in critical realist approaches *Math for Real Life* Jim Libby, 2017-01-26 Where are we ever going to use this Every high school math student has asked this question Often teachers themselves aren't sure how to respond One answer is that higher mathematics learned in high school will be essential to learning yet more at the college level A more satisfactory answer calls for an awareness of how math is applied in many specific areas Written primarily for

teachers this book presents hundreds of practical applications for mathematics from baseball statistics to the theory of relativity that can be understood by anyone with a knowledge of high school algebra geometry and trigonometry

Perspectives William F Brown, 2016-03-06 From the first seconds Following the Big Bang to our best guesses for the fate of the universe and humanity science provides stunning new perspectives about the place of humanity in the cosmos Humans may live on one planet in one small corner of the Milky Way itself one of billions of other galaxies but Earth may be unique in one respect Earth is teeming with life one species of which through chance and natural selection developed an extraordinary brain gifted with imagination curiosity and a compulsion to understand ourselves and the universe *Perspectives* is a journey through deep time from the creation of the universe to the beginnings of life our human origins and later the rise of culture and religion It explores what it means to be human and where our technology could take us in the years and centuries to come www.williamfbrown.com

Was the Cat in the Hat Black? Philip Nel, 2017-07-10 Racism is resilient duplicitous and endlessly adaptable so it is no surprise that America is again in a period of civil rights activism A significant reason racism endures is because it is structural it is embedded in culture and in institutions One of the places that racism hides and thus perhaps the best place to oppose it is books for young people *Was the Cat in the Hat Black* presents five serious critiques of the history and current state of children's literature tempestuous relationship with both implicit and explicit forms of racism The book fearlessly examines topics both vivid such as The Cat in the Hat's roots in blackface minstrelsy and more opaque like how the children's book industry can perpetuate structural racism via whitewashed covers even while making efforts to increase diversity Rooted in research yet written with a lively crackling touch Nel delves into years of literary criticism and recent sociological data in order to show a better way forward Though much of what is proposed here could be endlessly argued the knowledge that what we learn in childhood imparts both subtle and explicit lessons about whose lives matter is not debatable The text concludes with a short and stark proposal of actions everyone reader author publisher scholar citizen can take to fight the biases and prejudices that infect children's literature While *Was the Cat in the Hat Black* does not assume it has all the answers to such a deeply systemic problem its audacity should stimulate discussion and activism

Who is Allah? Bruce B. Lawrence, 2015-03-10 Engaging with the age old question of who is the God of Islam Bruce B. Lawrence stakes out the historical nuance of Allah throughout the past 1500 years from the earliest mention of his name to his appropriation by cyberspace

Engaging Higher Education Curricula Elmarie Costandius, Eli Bitzer, 2015-06-30 The authors aim to stimulate discussion about the nature and purposes of critical citizenship education in higher education Rather than promoting a blueprint for change the authors thoughtfully consider a generative research agenda for transformative higher education and focus on how this orientation in higher education plays out on the ground This book together with its Coda that takes the conversation beyond critical citizenship education to include responsible citizenship provides compelling reasons and sound suggestions for a way forward

Compassionate Equestrian Allen Schoen, Susan

Gordon,2015-08-17 This marvelous book borne of a unique collaboration between Dr Allen Schoen a world renowned veterinarian and author and trainer and competitor of many years Susan Gordon introduces the 25 Principles of Compassionate Equitation These Principles conceived by Dr Schoen and Gordon are a set of developmental guidelines encouraging a level of personal awareness that may be enacted not only through the reader s engagement with horses but can be extended to all humans and sentient beings he or she encounters The 25 Principles share stories and outline current peer reviewed studies that identify and support methods of training handling and caring for horses that constitute a safe healthy non stressful and pain free environment Through their Compassionate Equestrian program the authors encourage all involved in the horse industry to approach training and handling with compassion and a willingness to alleviate suffering By developing deeper compassion for their own horses and subsequently all equines equestrians transcend their differences in breed preferences riding disciplines and training methodologies This leads to the ability to empathize and connect more closely with the global collective of horses and horse people In doing so a worldwide community of compassionate equine practitioners and horse owners will emerge which will not only benefit the horses People involved with horses are found in many influential segments of society and have the potential to affect wide circles of friends acquaintances and co workers from every walk of life These are simple changes any horse person can make that can have a vast impact on the horse industry and society as a whole Social Entrepreneurship in the Middle East Dima Jamali,Alessandro Lanteri,2016-04-29 This two volume book unveils trends strengths weaknesses and overall dynamics and implications of social entrepreneurship in the Middle East region whilst identifying both opportunities and threats facing social entrepreneurship and supplements through a wealth of insights and examples inspired from practice and current applications Genetically Modified Organisms Giovanni Molteni Tagliabue,2023-04-20 Due to an intricate web of psychological socio political and economic factors an alliance of ill advised forces of radical activism and powerful commercial interests encourage the rejection of so called genetically modified organisms GMOs that is agri food products whose DNA has been directly retouched or recombined rDNA While the pseudo concept has no scientific meaning the opponents of the agro industry insist on attacking it as an alleged symbol of the exploitation of nature for greed and profit this socio political struggle in itself legitimate but directed at the wrong target fosters doubts and fears about the supposed negative effects of GMOs on the environment and health Instead scientists recommend carefully checking new individual plant varieties or animal breeds regardless of how they are obtained through rDNA or other processes Similarly the important socio economic pros and cons of the cultivation and consumption of agri food novelties in richer or poorer countries as well should be assessed independently of the developers biotech methods The book explains this contemporary taboo and calls for a well regulated use of all biotechnological innovations ending the decades long quagmire which stymies public research and its philanthropic repercussions The Politics of Leverage in International Relations H. Friman,2015-03-18 This unique volume unpacks the

concept and practice of naming and shaming by examining how governments NGOs and international organisations attempt to change the behaviour of targeted actors through public exposure of violations of normative standards and legal commitments

Trash Vortex Danielle Smith-Llera,2018-01-01 Millions of tons of plastic slip into oceans every year Some floats and travels slowly with the currents endangering the health of marine animals The rest is hardly visible but is far more dangerous Tiny bits of plastic sprinkle the ocean s surface or mix into the sandy seafloor and beaches It ends up inside birds fish and other animals harming them and ultimately humans Experts struggle with fear and hope as they work to stop the flood of plastic threatening living organisms across the globe

Death's Summer Coat Brandy Schillace,2016-01-15 Death is something we all confront it touches our families our homes our hearts And yet we have grown used to denying its existence treating it as an enemy to be beaten back with medical advances We are living at a unique point in human history People are living longer than ever yet the longer we live the more taboo and alien our mortality becomes Yet we and our loved ones still remain mortal People today still struggle with this fact as we have done throughout our entire history What led us to this point What drove us to sanitize death and make it foreign and unfamiliar Schillace shows how talking about death and the rituals associated with it can help provide answers It also brings us closer together conversation and community are just as important for living as for dying Some of the stories are strikingly unfamiliar others are far more familiar than you might suppose But all reveal much about the present and about ourselves

Food, Animals, and the Environment Christopher Schlottmann,Jeff Sebo,2018-09-14 Food Animals and the Environment An Ethical Approach examines some of the main impacts that agriculture has on humans nonhumans and the environment as well as some of the main questions that these impacts raise for the ethics of food production consumption and activism Agriculture is having a lasting effect on this planet Some forms of agriculture are especially harmful For example industrial animal agriculture kills 100 billion animals per year consumes vast amounts of land water and energy and produces vast amounts of waste pollution and greenhouse gas emissions Other forms such as local organic and plant based food have many benefits but they also have many costs especially at scale These impacts raise difficult ethical questions What do we owe animals plants species and ecosystems What do we owe people in other nations and future generations What are the ethics of risk uncertainty and collective harm What is the meaning and value of natural food in a world reshaped by human activity What are the ethics of supporting harmful industries when less harmful alternatives are available What are the ethics of resisting harmful industries through activism advocacy and philanthropy The discussion ranges over cutting edge topics such as effective altruism abolition and regulation revolution and reform individual and structural change single issue and multi issue activism and legal and illegal activism This unique and accessible text is ideal for teachers students and anyone else interested in serious examination of one of the most complex and important moral problems of our time

Documents,1940 **Clearing Emotional Clutter** Donald Altman,2016-02-14 Is emotional clutter blocking success in your personal and professional life You ve likely heard about the psychological benefits of clearing out the clutter in your surroundings but how do you handle your emotional clutter the psychological version of the jam packed closet or impenetrable garage Shutting away and trying to hide old pains and traumas creates toxic patterns that can keep you from having the life of your dreams Integrating mindfulness and cutting edge neuroscience international mindfulness expert Donald Altman teaches how to modify entrenched habits and patterns with only a few minutes of attention daily Altman first helps you realize what your baggage consists of and how to transform or jettison it He then shows how to avoid the daily danger of accumulating new emotional clutter No matter how fraught your life or relationships may be you can cleanse heal or accept the old wounds mistakes and disappointments With Altman s lifestyle tools you ll discover how to address your past better deal with the present and cultivate the best possible future Start fresh with *Clearing Emotional Clutter* *Military Review* ,2017 **Unforgettable** W. Michael Gray,2016-10-12 We have an uneasy relationship with the relentless deluge of information gushing out of academia and our media outlets To turn it off is escapist but to attempt to cognitively grapple with it is overwhelming In *Unforgettable* Enabling Deep and Durable Learning a nationally recognized master teacher gives professors and their students the means to chart a clear path through this information explosion Humans crave explanatory patterns and this book enables teachers to think deeply about their academic disciplines to find and articulate their core explanatory principles and to engage their students in a compelling way of thinking An alternative title for this book could be *Why the Best College Teachers Do What They Do* because the author articulates a compelling rationale that will equip faculty to create and deliver transformative courses Students in transformative courses grapple with essential questions and gain mental muscle that equips them for real world challenges *Neptune's Laboratory* Antony Adler,2019-11-19 An eyewitness to profound change affecting marine environments on the Newfoundland coast Antony Adler argues that the history of our relationship with the ocean lies as much in what we imagine as in what we discover We have long been fascinated with the oceans seeking to pierce the profundity of their depths In studying the history of marine science we also learn about ourselves Neptune s Laboratory explores the ways in which scientists politicians and the public have invoked ocean environments in imagining the fate of humanity and of the planet conjuring ideal world fantasies alongside fears of our species weakness and ultimate demise Oceans gained new prominence in the public imagination in the early nineteenth century as scientists plumbed the depths and marine fisheries were industrialized Concerns that fish stocks could be exhausted soon emerged In Europe these fears gave rise to internationalist aspirations as scientists sought to conduct research on an oceanwide scale and nations worked together to protect their fisheries The internationalist program for marine research waned during World War I only to be revived in the interwar period and again in the 1960s During the Cold War oceans were variously recast as battlefields post apocalyptic living spaces and utopian frontiers The ocean today has

become a site of continuous observation and experiment as probes ride the ocean currents and autonomous and remotely operated vehicles peer into the abyss Embracing our fears fantasies and scientific investigations Antony Adler tells the story of our relationship with the seas

Human Investment Management Prabhakaran Paleri, 2017-08-30 This book presents a thought provoking case for looking at human resource management from an entirely different perspective In the modern world organizations have to optimally manage resources to achieve the best results and the best way to do this is to identify humans as instruments of investment and not as resources Humans use resources in an activity Managing people as a subject was first studied as part of personnel management and became known as human resource management HRM in the early 80s However the basic principles remained largely unchanged The book argues that it is time that HRM is replaced by human investment management HIM where the entire approach of employee management in an organization shifts gears to human investment in activities In this approach no human is considered bad in relation to an organization if selected appropriately and trained well Everyone is productive though the returns may differ Humans can be invested in areas where they are best or can be trained to be the best according to various factors Unlike any other investment instruments humans value can be continuously upgraded for higher returns Thus the core of HIM is to maximize the return from each employee as an individual or as a member of the group with minimum expenditure and effort in him or her HIM can therefore reengineer and replace HRM slowly and steadily at the desired pace where maximum attention is paid to employee investment for improved results This is unlike HRM which primarily focuses on employee relations Turning around HRM to HIM will be the first step in inclusively aligning strategic human resource management with the overall human management As such HIM should be seen as a process by which the asset or capital value of individual humans can be increased by turning them into capital humans an entirely different outlook from the oft used term human capital
