Ecoambiguity, Community, and Development Scott Slovic,Swarnalatha Rangarajan,Vidya Sarveswaran,2014-02-19 *Ecoambiguity Community and Development* takes stock of cultural and environmental contexts in many different regions of the world by exploring literature and film Artists and scholars working in the social ecology environmental justice and postcolonial arenas have long recognized that as soon as we tug on a thread of ecodegradation we generally find it linked to some form of cultural oppression The reverse is also often true In the spirit of postcolonial ecocriticism the studies collected by Scott

Slovic R Swarnalatha and Vidya Sarveswaran emphasize the impossibility of disentangling environmental and cultural problems While not all the authors explicitly invoke Karen Thornber s term ecoambiguity or the concepts and terminology of postcolonial ecocriticism their articles frequently bring to light various ironies For example the fact that Ukrainian environmental experience in the twenty first century is defined by one of the world s most infamous industrial disasters the Chernobyl nuclear accident of 1986 yet Ukrainian culture like many throughout the world actually cherishes a profound even animistic attachment to the wonders of nature The repetition of this and other paradoxes in human cultural responses to the more than human world reinforces our sense of the congruities and idiosyncrasies of human culture Every human culture regardless of its condition of economic and industrial development has produced its own version of environmental literature and art but the nuances of this work reflect that culture s precise social and geophysical circumstances In various ways these stories of community and development from across the planet converge and diverge as told and explained by distinguished scholars many of whom come from the cultures represented in these articles
