

# An historic expansion of Miami-Dade's transit system won't be cheap

DP= Development cost YOP= Yearly operating cost

Miami-Dade leaders are promising to implement the new "SMART" plan for expanding rail lines well into the suburbs. A new study looks at potential costs for the expansion in six corridors throughout the county. County officials say they're confident they can build and operate the new system for less. The costs listed include construction, land acquisition and other expenses tied to development.

County leaders want Washington and Florida to cover significant chunks of the construction costs, and hope federal and state grants could cover well more than half of the costs to build the lines. The study assumed rail lines for each of the six corridors. But it also included an alternative bus-rapid-transit line for the Kendall route, which typically uses express buses picking up passengers at rail-like stations.

capacity of different stakeholders to work together and build urban resilience to climate change through an equity centered approach to cross sectoral collaboration Urban areas where the majority of the global population dwells are particularly vulnerable to a myriad of climate stressors the effects of which are acutely present in places and to communities that have been largely excluded from decision making processes Our need for working and learning together is at a critical threshold yet at present the process for and understanding of inter sectoral collaborations remains a theoretical ideal and falls short of the broad appeal that many have claimed Collaborating for Climate Equity argues that researcher practitioner partnerships offer a promising pathway toward ensuring equitable outcomes while building climate resilience By presenting five case studies from the United States Chile and Mexico each chapter explores the contours of developing robust researcher practitioner collaborations that endure and span institutional boundaries The case studies included in the book are augmented by a synthesis that reflects upon the key findings and offers generalizable principles for applying similar approaches to other cities across the globe This work contributes to a nascent knowledge base on the real world challenges and opportunities associated with researcher practitioner partnerships It provides guidance to academics and practitioners involved in collaborative research planning and policymaking *A Review of the United States Army Corps of Engineers*
