Ricci,2010-06-03 **Detroit** Lewis D. Solomon,2018-02-06 As America s most dysfunctional big city Detroit faces urban decay population losses fractured neighborhoods with impoverished households an uneducated unskilled workforce too few jobs a shrinking tax base budgetary shortfalls and inadequate public schools Looking to the city s future Lewis D Solomon focuses on pathways to revitalizing Detroit while offering a cautiously optimistic viewpoint Solomon urges an economic development strategy one anchored in Detroit balancing its municipal and public school district s budgets improving the academic performance of its public schools rebuilding its tax base and looking to the private sector to create jobs He advocates an overlapping tripartite political economy one that builds on the foundation of an appropriately sized public sector and a for profit private sector with the latter fueling economic growth Although he acknowledges that Detroit faces a long road to implementation Solomon sketches a vision of a revitalized economic sector based on two key assets vacant land and an unskilled labor force The book is divided into four distinct parts The first provides background and context with a brief overview of the city s numerous challenges The second examines Detroit s immediate efforts to overcome its fiscal crisis It proposes ways Detroit can be put on the path to financial stability and sustainability The third considers how Detroit can implement a new approach to job creation one focused on the for profit private sector not the public sector In the fourth and final part Solomon argues that residents should pursue a strategy based on the actions of individuals and community groups rather than looking to large scale projects

truly be environmentally conscious Green Capitalism offers a critical historically informed perspective on building a more sustainable economy Written by scholars of business history and environmental history the essays in this volume consider the nature of capitalism through historical overviews of twentieth century businesses and a wide range of focused case studies Beginning early in the century contributors explore the response of business leaders to environmental challenges in an era long before the formation of the modern regulatory state Moving on to midcentury environmental initiatives scholars analyze failed business efforts to green products and packaging such as the infamous six pack ring in the 1960s and 1970s The last section contains case studies of businesses that successfully managed greening initiatives from the first effort by an electric utility to promote conservation to the environmental overhaul of a Swedish mining company to the problem of household waste in pre 1990 West Germany Ranging in geographic scope from Europe to the United States Green Capitalism raises questions about capitalism in different historical sociocultural and political contexts Contributors Hartmut Berghoff Ann Kristin Bergquist Brian C Black William D Bryan Julie Cohn Leif Fredrickson Hugh S Gorman Geoffrey Jones David Kinkela Roman Kster Joseph A Pratt Adam Rome Christine Meisner Rosen *Intelligent Systems and Applications* Yaxin Bi,Rahul Bhatia,Supriya Kapoor,2019-08-23 The book presents a remarkable collection of chapters covering a wide range of topics in the areas of intelligent systems and artificial intelligence and their real world applications It gathers the proceedings of the Intelligent Systems Conference 2019 which attracted a total of 546 submissions from pioneering researchers scientists industrial engineers and students from all around the world These submissions underwent a double blind peer review process after which 190 were selected for inclusion in these proceedings As intelligent systems continue to replace and sometimes outperform human intelligence in decision making processes they have made it possible to tackle a host of problems more effectively This branching out of computational intelligence in several directions and use of intelligent systems in everyday applications have created the need for an international conference as a venue for reporting on the latest innovations and trends This book collects both theory and application based chapters on virtually all aspects of artificial intelligence presenting state of the art intelligent methods and techniques for solving real world problems along with a vision for future research it represents a unique and valuable asset **Airman's Guide** ,1955 **Unfolding the Geology of the West** Stephen M.
