characteristics of various measures of financial sector competition The second part includes several empirical studies on the level of and trends in competition across countries The third part deals with the spillovers of market power to other sectors and the economy as a whole Finally the fourth part considers competition in banking submarkets and subsectors

Regulation of and by Pharmacists in the Netherlands and Belgium Niels Philipsen, 2003 This book examines the regulation of pharmacists in the Netherlands and Belgium from the perspective of law and economics It starts with an extensive and accessible overview of the economic literature with respect to the regulation including selfregulation of liberal professions Subsequently this book analyses the extent to which the current regulation of Dutch and Belgian pharmacists serves the public interest and the extent to which this regulation is a result of rent seeking behaviour by private interest groups The author concludes that some regulation notably with respect to advertising design of the pharmacy establishment of pharmacies and drug prices does not seem to serve the public interest Moreover he criticises the regulation of reimbursement for the pharmacist which in both countries is still linked to the pharmacist s monopoly in the distribution of drugs despite new tasks of the pharmacist in the field of pharmaceutical care In addition to a theoretical analysis the author carries out an empirical research of rent seeking behaviour in the pharmaceutical market Although the book studies the situation in the Netherlands and in Belgium its conclusions will certainly apply to other countries and other professions The book will therefore be of interest to all economists lawyers and practitioners interested in regulation of the liberal professions as well as practitioners and academics working in the field of health care

Dimensions, 1965 *The Intended and Unintended Effects of U.S. Agricultural and Biotechnology Policies* Joshua S. Graff Zivin, Jeffrey M. Perloff, 2012-03-15 Using economic models and empirical analysis this volume examines a wide range of agricultural and biofuel policy issues and their effects on American agricultural and related agrarian insurance markets Beginning with a look at the distribution of funds by insurance programs created to support farmers but often benefiting crop processors instead the book then examines the demand for biofuel and the effects of biofuel policies on agricultural price uncertainty Also discussed are genetically engineered crops which are assuming an increasingly important role in arbitrating tensions between energy production environmental protection and the global food supply Other contributions discuss the major effects of genetic engineering on worldwide food markets By addressing some of the most challenging topics at the intersection of agriculture and biotechnology this volume informs crucial debates
