This volume exemplifies ICAM's comparative orientation in its broad scope of management perspectives in its diverse locations of its research as well as its application and in its comparisons of findings, methodologies, and operational definitions. Part 1 Organization Theory Change and Effectiveness discusses the relationship between ethical orientation and crisis management before and after the World Trade Center attacks and high success rates of organizational development and modern Hindu work ethics. Part 2 Behavior and Attitudes in Organizations offers a nuanced perspective on organization's behavior: academic wisdom versus practical realities in organization and regulatory focus as a determinant of occupational status. Part 3 Business and Society Ethics and Values looks at crises in corporations and government due to corruption and unethical behavior. Part 4 International and Cross Cultural Management looks at studies on leader power and how it is associated with subordinates, conflict management strategies, and propensity to leave a job in four countries; the role of commitment to change as it is associated with reaction to organizational change in India; and effective management of interdepartmental conflict in Greece.
