## MINOLTA SPOTMETER F

Minolta's Spotmeter F is designed specifically for professionals and advanced amateurs and enables precise 1° spot measurements of both ambient and flash light. A full range of exposure information is shown in digital and analog form on external and viewfinder displays.

Besides enabling accurate readings of mid-tone areas, the Spotmeter F can automatically calculate the correct exposure for highlight and shadow areas, as well calculate the average exposure from two readings. To monitor contrast and lighting conditions, the relative brightness of various parts of the scene can be quickly checked while looking through the viewfinder.

The Spotmeter F uses advanced micro-electronic circuitry to assure the highest possible accuracy and reliability. And its low power consumption permits a single, inexpensive AA-size penlight battery to provide thousands of readings.

To obtain the best results and to get maximum use from your Minolta Spotmeter F, please read this manual thoroughly.
