Narratives of Qualitative Research Josh Tenenbergh, 2024-05-21 Narratives of Qualitative Research uses a novel form of writing about how to do qualitative research called a praxis narrative Each narrative is told from the author s perspective in carrying out one of his past research studies in the social sciences Told chronologically and in a first person voice the narratives position the reader alongside the narrator so as to vicariously experience how research happens in its situated particulars Rather than a set of idealizations and universalized pronouncements the author reveals what really goes on when one is in the thick of complex and challenging research studies

the points of trouble along with the successes This will be relevant to researchers who have already undertaken one or more empirical research studies though not necessarily using qualitative approaches and now find themselves facing something new a new analytic method a new theoretical lens a new form of data collection a new domain of research questions a new rhetorical approach This requires letting go of the secure handholds of prescribed methods and responding to the contingencies that arise in the midst of the research The reader is invited to follow along as the author makes visible his praxis of qualitative research Unlike more conventional texts in this unique alternative the reader can follow the author's journey through his research studies as a way to reorient their conception of qualitative research and their own praxis of it This is fascinating reading for qualitative researchers and students taking qualitative research courses across the social sciences education and behavioural sciences

Design Change to Fishery Independent Surveys: When to Adjust and How to Account For It Fabio Campanella, Ben Scoulding, Nathan Bacheler, Kyle Shertzer, 2025-03-07 Fishery independent surveys provide crucial information for monitoring and assessing marine fish stocks Their utility can largely be attributed to sampling procedures that are consistent across space and time such that observed dynamics can reasonably be assumed to reflect those of the population or

community being studied However sometimes changes to the survey design become desirable or necessary They may be desirable if the benefits of modification outweigh the benefits of consistency for example with improvements in sampling technology or efficiency revised survey priorities or increased funding that allows for greater spatial coverage or temporal resolution In other cases changes to the survey design may not be desirable but necessary for example when specific supplies or equipment become unobtainable or with reductions in funding ship time or human resources
