search for probabilistic rather than absolute truth This two volume set will contain a variety of ways that data quality can be instituted into a science curriculum To support its use many of the examples that I will present involve science teachers as well as student work and feedback from different grade levels and in different scientific disciplines Specific chapters will be devoted to reviewing the academic literature on data quality as well as describing my own personal research on this important but often neglected topic Handbook of Research on Educational Technology Integration and Active Learning Keengwe, Jared,2015-05-31 As today s teachers prepare to instruct a new generation of students the question is no longer whether technology should be integrated into the classroom but only how Forced to combat shorter attention spans and an excess of stimuli teachers sometimes see technology as a threat rather than a potential enhancement to traditional teaching methods The Handbook of Research on Educational Technology Integration and Active Learning explores the need for new professional development opportunities for teachers and educators as they utilize emerging technologies to enhance the learning experience Highlighting the advancements of ubiquitous computing authentic learning and student centered instruction this book is an essential reference source for educators academics students researchers and librarians

**Learning Management System Technologies and Software Solutions for Online Teaching: Tools and Applications** Kats, Yefim,2010-05-31 This book gives a general coverage of learning management systems followed by a comparative analysis of the particular LMS products review of technologies supporting different aspect of educational process and the best practices and methodologies for LMS supported course delivery Provided by publisher **Research on Integrating Language and Content in Diverse Contexts** MaryAnn Christison,JoAnn (Jodi) Crandall,Donna Christian,2022-05-09 Co published with The International Research Foundation for English Language Education TIRF the ninth volume in the Global Research on Teaching and Learning English series presents research on the practice of integrating content and language in diverse contexts where English is used as a medium of instruction With chapters written by TIRF Doctoral Dissertation Grant awardees and other scholars the volume offers an overview of a wide range of methodological approaches to teaching content in English to English learners and examines factors that impede or contribute to effective instruction The chapters include findings from original empirical research as well as overviews of existing research and model programs providing valuable insights and taking into account a multitude of contextual features Offering up to date research on integrating language and content at the primary secondary and postsecondary levels this book familiarizes readers with the latest advances in theory and practice It is a key text for teacher education courses for preservice teachers a resource for professional development programs for practicing teachers and a useful reference for researchers
