"The Things They Carried" is a powerful collection of short stories by American novelist Tim O'Brien. First published in 1990, the stories have already made a powerful impact on American youth as there are numerous subjects that most young people can relate to. The graphic description of the battlefield and the loss are often used as allegories by the author as a way to create various comparisons. It is done in an accessible way, which makes the book especially valuable for readers of all social backgrounds.

At the same time, it is not an easy book to read as the stories progress. Examining the role of the moral principles in "The Things They Carried" by Tim O'Brien, it's hard to deny that the interrelation between civil life with all the memories and the horrors of war work together to challenge the characters. The constant flashbacks help to set definitions of the moral considerations and personal qualities of the individuals described in the book. These, often contrasting, aspects make the book quite powerful and add to the dynamism of the author's style.

Critical Analysis in Psychology: the Essential Guide to Interrogating Published Research A.J. Shepherd, 2022-10-19 This book is the fruit of Alex Shepherd's remarkable teaching experience in one of the most prestigious universities in the world. This publication will certainly become the main reference for science students at BSc MSc and PhD levels. Roberto Filippi PhD University College London I highly recommend this book as essential reading for psychology students at all levels from undergraduate to PhD. It provides a friendly and engaging guide to developing critical evaluation skills through the use of clear and accessible examples that capture the reader's interest. Dr Elisa Lewis Senior Lecturer London South Bank University. Alex Shepherd offers an accessible forensic filleting of published research articles with helpful how-to guides showing what questions to ask and more importantly what the answers mean. Gina Rippon Professor Emeritus of Cognitive Neuroimaging Author of *The Gendered Brain*. If something is published does that mean it's true? Critical Analysis in Experimental Psychology encourages the critical reading and analysis of psychological research reports and shows how design principles and statistics are applied. A.J. Shephard empowers you to read between the lines of any published study and draw your own conclusions. Using synopses of published research articles as examples, the book shows how to work out if summary claims made by authors or the media accurately reflect an experiment's real findings. Through guided analysis of both quantitative and qualitative real-world research, you will learn to Review research articles comprehensively and critically Understand the rationale, logic and purpose of an article Identify the hypotheses, whether stated or unstated Describe and assess the suitability of the research methods used Analyse the implied interpretation of the results Become an active rather than a passive reader of scientific articles. This book gives new insight into published research articles, helping you feel less like a student and more like a researcher. The critical skills learned will help you to navigate through the confusing science messages we are exposed to through all types of media. Dr A.J. Shepherd has over 20 years of experience teaching Critical Analysis. She is a Reader in Psychology at Birkbeck University of London, UK, and since 2004 she has run the third-year Critical Analysis course, which she also designed.

Research Methods for Forensic Psychologists Sarah Brown, Emma Sleath, 2015-06-26. *Research Methods for Forensic Psychologists* is an accessible and comprehensive textbook that introduces students to the research process in forensic psychology. Adopting a problem-based learning approach, this book offers a how-to guide to the whole research process and empowers readers to develop their own programme of research from initial vague ideas to developing a research question, to carrying out a methodologically rigorous research project, to disseminating the findings. The text is centred on five case studies sufficiently different in nature to address the most common research methodologies. Each case study is linked with a specific research question that will be used to illustrate the research process throughout the rest of the book. Topics covered in the book include: Design and Planning including a literature search; a discussion of different sorts of data; practical and feasibility issues; research ethics; and developing a research proposal. Conducting research including the submission of ethics proposals and responding to feedback; collecting data and dealing with the problems and challenges of analysing data; Dissemination of findings; an overview of the different types of papers with examples listed; and other methods of disseminating findings discussed such as conference presentations and the use of social media. Throughout, issues of common difficulty or confusion are highlighted and activities are provided for readers to consider and apply the information discussed further. Additional reading sections and summaries are also provided at the end of each chapter. This book is essential reading for advanced students in Forensic Psychology as well as trainees and practitioners within relevant forensic psychology organisations.
