

ROTARY SWITCH REAR FAN CONTROLLER

SERVICE MANUAL

Note: The MONOPLEX Rear Fan Controller is a device used to switch power from the battery in a conversion van. Power from the battery should be connected to the controller through some type of approved circuit protection. Inadvertent shorts of the wires coming to or going out of the controller could result in damage and/or injury.

ALL SERVICING OF THE SYSTEM SHOULD BE DONE ONLY BY A QUALIFIED TECHNICIAN.

Tools required: Low current test light, DC voltmeter

PRODUCT DESCRIPTION

The Rotary Switch MONOPLEX Rear Fan Controller is a member of Intellitec's MONOPLEX family of "one wire" controllers. Using this system, multiple switches connected with a single light gauge wire and ground, can be used to control a load such as the rear fan in a conversion van. This module can utilize a rotary switch typically found on the dash of a conversion van, as well as a push button switch in the rear, to change speeds of the fan.

To operate the fan, the ignition must be turned on. When the ignition is turned on, the fan will operate at the speed set by the rotary switch. The fan speed can be changed using the rotary switch by simply turning it to a new speed. The fan speed can also be changed using a momentary switch. Pressing the momentary switch will stop the fan to the next lower speed. The next press of the switch will change the speed to the next lower speed, rotating around from off, to high, to medium, to low, and then to off, and so on.
