GENERAL SAFETY INFORMATION:

1. Mount the time switch in the desired location using the three mounting holes which are provided. Mount the time switch at eye level, if possible, providing sufficient room to the left of the enclosure for the cover to swing open fully. (See Fig. #2). The time switch mechanism does not need to be removed from the enclosure to mount the time switch since the top mounting hole is a slotted type mounting hole. Secure a screw or other fastener at eye level. The head of the screw of fastener should be slightly larger than the narrow portion of the slotted hole to ensure that the time switch is securely held in place. The remaining two mounting holes provide a means to secure the time switch.
2. If you do remove the mechanism, refer to Figure #3 and remove the mechanism from the case by depressing the catch at the top of the case and pulling out.

Fig. 2

Fig. 3

3. Replace the mechanism in the case if it has been removed, making sure to engage ribs at sides of mechanism between ears at sides of case before snapping in place.
4. Lift the left side of the insulator off of the retaining post and pivot it up and away to expose the terminal screws.
5. Strip the supply and load wires by removing 1/2 inch of insulation. **DO NOT USE ALUMINUM WIRE.** Insert the wire ends under the proper terminal plates and tighten the screws firmly. Use any size wire AWG #10. Connect ground wire to grounding terminal at bottom of case.
6. Replace the plastic insulator.
7. Follow instructions for battery installation. Be sure that the battery is functioning properly. This can be checked by seeing that the display is visible. If the display has scrambled information, check to be sure that the polarity orientation of the battery is as shown on the cover label, then press the RESET switch and hold for at least two seconds. Note that the battery can easily be replaced without removing the time switch mechanism or field wiring. Simply press in and downward (in the direction of the arrow) on the battery cover which is identified with the word "Battery". It is recommended that the battery be replaced with a "AA" industrial grade alkaline cell at two to three
