### 9mm Luger

#### Test Specifications

Remington-Union Model 9  
Std. Length/Weight: 10.10"/150

#### Test Components

Case: Federal  
Trim-to Length: .750"  
Primer: Federal 100

#### Remarks:

Introduced in 1900, the 9mm Luger is probably the oldest cartridge still in common use on a world-wide scale. To say that the 9mm has been successful would be an understatement of monumental proportions. Today, the cartridge is not only holding its own, but is actually gaining in popularity. It received a big boost in 1985, when the U.S. military adopted the 9mm Luger as the "new" cartridge for service pistols. In addition to its military duties, the 9mm has been embraced by many local, state, and federal law enforcement agencies as well. Ever since the days of the wild west, the idea of a rifle/handgun combination in the same caliber has always been a concept unique to America. This notion has given rise to a number of rifles chambered for cartridges normally associated with handguns. The 9mm Luger is one of them.

Many of the rifles chambered for the 9mm are carbine-length, semi-automatic copies of submachineguns, such as the Uni carbine, and the H&K 91, a variant of the MP5. Our test rifle was the Mauser Model 9 Camp Carbine, an original design. Despite the differences in their appearance, all of these rifles are basically suited to the same range of tasks: small game, varmints, and plinking. Ken Hackathorn, a highly respected gunwriter and defensive shooting instructor, has recommended the Camp Carbine as a viable candidate for home defense. For shooters unable to master the heavier recoil of a shotgun, or unable to obtain a handgun due to local ordinances, this is a feasible option.

While the 9mm may qualify as a fairly powerful pistol cartridge, it is rather anemic in a rifle. Whether used in a rifle or handgun, the 9mm is neither adequate nor suitable for use on big game. When loaded with the lighter weight bullets, which showed the greatest increase in velocity over handgun data, the 9mm is effective for small game and varmints out to 50 or 75 yards. When used within its limitations, the 9mm Luger in a rifle can be an enjoyable combination.
