Chapter Review

1. Leasing has grown tremendously in popularity. Today, it is the fastest growing form of capital investment. The previous FASB standard on leasing depended on whether a lease qualified as an operating lease or a financing lease. In an operating lease, companies did not report an asset on their balance sheet for the item they leased, nor did they report a related liability for their lease obligation. Only if the company had a finance lease would companies have to report an asset and a related liability on the balance sheet. However, the FASB has issued a new standard on leasing that mandates that all companies will have to report both assets and related liabilities for practically all lease arrangements. This accounting change will have a significant impact on many companies' balance sheets.

The Leasing Environment

2. (L.O. 1) A lease is a contractual agreement between a lessor and a lessee. This arrangement gives the lessee the right to use specific property, which is owned by the lessor, for a specified period of time. In return for the use of the property, the lessee makes rental payments over the lease term to the lessor.

Advantages of Leasing-Lessee

3. From the perspective of the lessee, leasing can provide the following significant advantages: (a) 100% financing at fixed rates, (b) protection against obsolescence, (c) flexibility, and (d) less costly financing.
