TWENTY-FIRST CENTURY'S FUEL SUFFICIENCY ROADMAP STEVE ESOMBA, Dr.,2012-06-06 We badly need new sources of clean energy to generate electricity, heat and power our industries, homes and workplaces. Up to now we have relied on and used only fossil fuels to power our industrial and domestic activities. The byproducts of fossil fuels include irreversible pollution and contamination of our Earth, climate change, global warming and increase in pathogenic and medication-resistant diseases. Exhaustible fossil fuels are expensive to produce and distribute, and not everybody can afford them. Why not switch to natural, non-polluting, inexpensive, inexhaustible fuels such as solar, wind, water, etc. fuels? This is the timely message contained in TWENTY-FIRST CENTURY'S FUEL SUFFICIENCY ROADMAP. You can make this message realisable. Go on reading. Thanks.

Manual of Romance Word Classes Anna-Maria De Cesare, Giampaolo Salvi, 2024-09-02 Word classes are linguistic categories serving as basis in the description of the vocabulary and grammar of natural languages. While important publications are regularly devoted to their definition, identification and classification in the field of Romance linguistics we lack a comprehensive state of the art overview of the current research. This Manual offers an updated and detailed discussion of all relevant aspects related to word classes in the Romance languages. In the first part word classes are discussed from both a theoretical and historical point of view. The second part of the volume takes as its point of departure single word classes described transversally in all the main Romance languages while the third observes the relevant word classes from the point of view of specific Romance based varieties. The fourth part explores Romance word classes at the interface of grammar and other fields of research. The Manual is intended as a reference work for all scholars and students interested in the description of both the standard major Romance languages and the smaller lesser described Romance based varieties
