different frameworks and research methodologies is concerned All the contributors are proponents of recent developments in their individual areas of specialization The editors have taken special care to cater for a readership which should be as broad as possible This means that each contribution is self contained and does not presuppose any knowledge of Vietnamese The volume is recommended to general linguists comparative linguists typologists and to researchers specializing in languages of East and South East Asia

Laboratory Phonology 7 Carlos Gussenhoven, Natasha Warner, 2008-08-22 This collection of recent papers in Laboratory Phonology approaches phonological theory from several different empirical directions Psycholinguistic research into the perception and production of speech has produced results that challenge current conceptions about phonological structure Field work studies provide fresh insights into the structure of phonological features and the phonology phonetics interface is investigated in phonetic research involving both segments and prosody while the role of underspecification is put to the test in automatic speech recognition

Deconstructing Ergativity Maria Polinsky, 2016-04-12 Building upon theoretical innovations and extensive empirical findings this book explains variation in the syntactic behavior of ergative arguments across languages It offers a new analysis of ergativity by recognizing two distinct types PP ergative and DP ergative languages Each type is characterized by a set of correlated features which result in structural consistency

Typological Studies Guglielmo Cinque, 2014-02-04 In this book Cinque takes a generative perspective on typological questions relating to word order and to the syntax of relative clauses In particular Cinque looks at the position of the Head vis vis the relative clause in relation to the position of the verb vis vis his object a general cross linguistic analysis of correlatives the need to distinguish a sentence grammar from a discourse grammar type of non restrictives with languages differing as to whether they possess both one the other or neither a selective type of extraction from relative clauses and a tentative sketch of a more ample work in progress on a unified analysis of externally headed internally headed and headless relative clauses
