development of China's industry chains in a changing landscape. As the trend of deglobalization is intensifying, the global supply chain has suffered from external shocks, prompting both the private and public sectors to reflect on the stability of the supply chain. As such, governments are putting greater emphasis on the resilience and security of industry chains. How will the changing circumstances across the globe affect China's industry chains? This book suggests that amidst the trend of deglobalization, it is important for China to leverage its advantages in economies of scale to improve both the efficiency and security of industry chains. By examining the current state of global trends, international trade, and industrial policies, the book outlines potential pathways of the development of global supply chains and provides insights on the challenges and opportunities for China. This book also focuses on strategically important sectors in the digital, green, logistics, and manufacturing industries, presenting an in-depth discussion of the prospects of each industry chain. Being both readable and academically rigorous, this book is well suited for readers from the fields of public policy, economics, finance, and for those who seek to better understand the reshaping of China's industry chains. The work cites information from various sources, including academic journals, policy institutions, and a network of primary sources such as industry experts and renowned academics.

**Unnatural Selection** Mara Hvistendahl, 2011-06-07. Finalist for the Pulitzer Prize. A Slate Best Book of 2011. A Discover Magazine Best Book of 2011. Lianyungang, a booming port city, has China's most extreme gender ratio for children under four: 163 boys for every 100 girls. These numbers don't seem terribly grim, but in ten years, the skewed sex ratio will pose a colossal challenge. By the time those children reach adulthood, their generation will have twenty-four million more men than women. The prognosis for China's neighbors is no less bleak. Asia now has 163 million females missing from its population. Gender imbalance reaches far beyond Asia, affecting Georgia, Eastern Europe, and cities in the U.S. where there are significant immigrant populations. The world, therefore, is becoming increasingly male, and this mismatch is likely to create profound social upheaval. Historically, eras in which there have been an excess of men have produced periods of violent conflict and instability. Mara Hvistendahl has written a stunning, impeccably researched book that does not flinch from examining not only the consequences of the misbegotten policies of sex selection but Western complicity with them.

*New Progress of Regulations and Judicial Practice of Intellectual Property* Deli Cheng, Xinmiao Yu, Klaus Bacher, 2024-12-09. This open access book brings together two types of cases at home and abroad. One is the latest influential cases in the field of intellectual property rights in the past three years, and the other is the classic intellectual property cases in the world. The types of cases involve typical cases in the fields of patents, trademarks, copyrights, unfair competition, etc., involving a wide range of intellectual property laws and a complete range of categories. Some cases have been a sensation, and some legal issues have been raised or clarified for the first time in relevant judgments. Many cases not only have a wide range of social influence but also have typical legal application significance. Many cases involve facts and legal issues that go beyond the case and the adjudication itself and have greater reference significance. At the same time, we also attached the different

opinions of some case judgments such as the Concurring Opinion and the Dissenting Opinion in the US judgment reflecting the different understandings of different judges on the application of the law This part is also very meaningful
