Demirci, Joop van der Schree, 2015-08-31 This book is an initiative presented by the Commission on Geographical Education of the International Geographical Union. It focuses particularly on what has been learned from geospatial projects and research from the past decades of implementing geospatial technologies (GST) in formal and informal education. The objective of this publication is to inform an international audience of teachers, professionals, scholars, and policymakers about the state of the art and prospects of geospatial practices (GPs) as organized activities that use GST and lessons learned in relation to geographical education. GST make up an advanced body of knowledge developed by practitioners of geographic information systems (GIS), remote sensing (RS), global positioning systems (GPS), and digital cartography (DC). GST have long been applied in many different sectors; however, their first use in higher education began in the early 1980s and then diffused to secondary schools during the 1990s. Starting with GIS and RS, it evolved into a much broader context as GST expanded to include GPS and DC with new communication technologies and Internet applications. GST have been used around the world as a combination of tools and special techniques to make research, teaching, and learning more effective. **Independent**

Learning in Action Tom Schimmer, Garnet Hillman, Mandy Stalets, 2018-01-31 Get past the knowing-doing gap and confidently implement standards-based learning. This book offers a comprehensive look at what standards-based learning looks like in action, from creating formative assessments to using data to inform instruction to transitioning to standards-based grading systems. Instead of comparing students to each other, standards-based learning compares students' proficiency to performance standards and education targets. Each chapter offers readers a well-thought-out action plan for implementation and effective strategies for communicating with students and parents about the classroom changes that will occur during the transition. Use this book as your action plan for implementing standards-based learning. Explore concrete steps for putting standards-based grading, instruction, and learning into action. Implement schoolwide change beginning with classroom practices. Address common implementation mistakes and challenges. Effectively sequence units and align them with unpacked standards. Create effective proficiency level scales and rubrics. Contents: Introduction; Chapter 1: Standards-Based Learning in Action; Chapter 2: Standards Alignment in Action; Chapter 3: Formative Assessment in Action; Chapter 4: Effective Feedback in Action; Chapter 5: Meaningful Homework in Action; Chapter 6: Self and Peer Assessment in Action; Chapter 7: Summative Assessment in Action; Chapter 8: Retakes and Reassessment in Action; Chapter 9: Proficiency Scales and Rubrics in Action; Chapter 10: Standards-Based Reporting in Action; Epilogue; References and Resources; Index.

Differentiation in Middle and High School Kristina J. Doubet, Jessica A. Hockett, 2015-07-14 In this one stop resource for middle and high school teachers Kristina J Doubet and Jessica A Hockett explore how to use differentiated instruction to help students be more successful learners regardless of background native language learning style motivation or school savvy They explain how to Create a healthy classroom community in which students unique qualities and needs are as important as the ones they have in common Translate curriculum into manageable and meaningful learning goals that are fit to be differentiated Use pre assessment and formative assessment to uncover students learning needs and tailor tasks accordingly Present students with avenues to take in process and produce knowledge that appeal to their varied interests and learning profiles Navigate roadblocks to implementing differentiation Each chapter provides a plethora of practical tools templates and strategies for a variety of subject areas developed by and for real teachers Whether you re new to differentiated instruction or looking to expand your repertoire of DI strategies Differentiation in Middle and High School will show you classroom tested ways to better engage students and help them succeed every day

A University Education David Willetts, 2017-11-17 Universities have a crucial role in the modern world In England entrance to universities is by nation wide competition which means English universities have an exceptional influence on schools a striking theme of the book This important book first investigates the university as an institution and then tracks the individual on their journey to and through university In A University Education David Willetts presents a compelling case for the ongoing importance of the university both as one of the great institutions of modern society and as a transformational experience for the individual The book also makes illuminating comparisons with higher education in other countries especially the US and Germany Drawing on his experience as UK Minister for Universities and Science from 2010 to 2014 the author offers a powerful account of the value of higher education and the case for more expansion He covers controversial issues in which he was involved from access for disadvantaged students to the introduction of 9 000 fees The final section addresses some of the big questions for the future such as the the relationship between universities and business especially in promoting innovation He argues that the two great contemporary trends of globalisation and technological innovation will both change the university significantly This is an authoritative account of English universities setting them for the first time in their new legal and regulatory framework
