One now also hears of the complicity

of some of these platforms in data breaches that have contributed to the making and unmaking of political fortunes of key political parties across geographies This unprecedented power of platforms is however being challenged today Data breaches evidence of platform manipulations platform complicities with state surveillance and their monopolist behaviours and its consequences for competition and data privacy have become the basis for regulatory responses from governments throughout the world National and regional courts of law have collected a lot of evidence on myriad forms of platform illegalities that discriminate against competitors and that point to the privatization of personal data on a global scale The proposed volume provides an introduction to some of the issues and challenges related to platform regulation the conundrums and paradoxes involved and also to some of the well conceived and manageable regulatory pathways currently being explored by national and regional governments It highlights regulatory responses from four jurisdictions the European Union USA India and Australia
