Landmark Essays on Rhetorical Genre Studies Carolyn R. Miller, Amy J. Devitt, 2024-11-01 Landmark Essays on

Rhetorical Genre Studies gathers major works that have contributed to the recent rhetorical reconceptualization of genre. A lively and complex field developed over the past 30 years, Rhetorical Genre Studies is central to many current research and teaching agendas. This collection, which is organized both thematically and chronologically, explores genre research across a range of disciplinary interests but with a specific focus on rhetoric and composition. With introductions by the co-editors to frame and extend each section, this volume helps readers understand and contextualize both the foundations of the field and the central themes and insights that have emerged. It will be of particular interest to students and scholars working on topics related to composition, rhetoric, professional and technical writing, and applied linguistics.

Supervising Student

Teachers Alexander Cuenca, 2013-02-11. The student teaching experience is often considered one of the most influential aspects of teacher preparation. Key to the success of student teaching is the university supervisor. During the student teaching experience, the university supervisor is mainly responsible for helping pre-service teachers relate university coursework with the situated experiences in schools. However, much like the various other spaces and places in teacher education, facilitating teacher learning is an incredibly complex endeavor. This edited volume addresses the complexities of supervising student teachers from three distinct vantage points. First, salient issues regarding the supervision of student teachers, such as the preparation of novice supervisors, negotiating power in the student teaching triad, and the low status of clinical teacher education, are examined. Second, different pedagogical frameworks for the work of supervision are provided, such as care theory, teacher education for democracy and social justice. Finally, future directions for field-based teacher education are discussed, such as a call to reconsider where supervision takes place, the necessity to develop a pedagogy of supervision, 21st-century trends facing clinical teacher education, and the value added by university supervisors to teacher development. Each of these chapters engages the supervision of student teachers through a mix of research theory and personal stories from the field. As such, this edited volume is designed for new supervisors, veteran supervisors, and supervision scholars.
