Clinician's Guide to Medical Writing Robert B. Taylor, 2006-03-20 This book is for the clinician who wants to write. It is for the physician, physician assistant, or nurse practitioner who sees patients and who wants to contribute to the medical literature. You may be an assistant professor aspiring to promotion or a clinician in private practice who seeks the personal enrichment that writing can bring. If you are new to medical writing or even if you have been the author of some articles or book chapters and seek to improve your abilities, this book can help you. Who am I that I can make this assertion and write this book both fairly and presumptuously? Here is my reasoning. As a practicing physician, writing has been my avocation. Unlike the authors of many other writing books, I am not a journal editor. Over 14 years in private practice and 26 years in academic medicine, I have written all the major models described in this book: review articles, case reports, editorials, letters to the editor, book reviews, book chapters, edited books, authored books, and reports of clinical research studies. Most have been published. Not all. Perhaps my most significant qualification is not that I have managed to produce a lengthy curriculum vitae. In my opinion, what is more important for you, the reader, is that I have made all the errors. That's right, the mistakes. **Transforming**

Transformation in Research and Teaching at South African Universities Rob Pattman, 2018-12-20 What is transformation in contemporary South African higher education? How can it be facilitated through research and pedagogic practices? These questions are addressed in this edited collection by established academics and emerging research students from nine South African universities. The chapters give us access to students' worlds, how they construct experience and navigate their complex spheres on and off campus. **Approaches and Applications of Business Research Methods**

Academic Voices Kjersti Fløttum, Trine Dahl, Torodd Kinn, 2006-08-10 This book explores how the voices of authors and other researchers are manifested in academic discourse and how the author handles the polyphonic interaction between these various parties It represents a unique study of academic discourse in that it takes a doubly contrastive approach focusing on the two factors of discipline and language at the same time It is based on a large electronic corpus of 450 research articles from three disciplines economics linguistics and medicine in three languages English French and Norwegian The book investigates whether disciplines and languages may be said to represent different cultures with regard to person manifestation in the texts What is being studied is thus cultural identities as tendencies in linguistic practices For the majority of the features focused on e g metatext and bibliographical references the discipline factor turns out to

contribute more strongly to the variation observed than the language factor. However, for some of the features (e.g. pronouns and negation) the language factor is also quite strong. Additional background information on the investigations reported in this book can be found at www.uib.no/kiap. **Successful Lab Reports** Christopher S. Lobban, MarLa Schefter, 1992-02-28
