Psychology and the international dimension

IB psychology takes a holistic approach that fosters intercultural understanding and respect. In the core of the IB psychology course, the biological level of analysis demonstrates what all humans share, whereas the cognitive and sociocultural levels of analysis reveal the immense diversity of influences that produce human behavior and mental processes. Cultural diversity is explored and students are encouraged to develop empathy for the feelings, needs and lives of others within and outside their own culture. This empathy contributes to an international understanding.

- c. **Quantitative research methods** – using specific results from experimentation to prove our hypotheses.
- d. **Qualitative research methods** – ways to use correlation to strengthen our arguments if experimentation is not possible.
- d. **Analysis of Results** – use of central tendency, standard deviation and validation.

TOK AREAS FOR DISCUSSION IN THIS UNIT:
