Julia Programming for Operations Research Changhyun Kwon, 2019-03-03 Last Updated December 2020 Based on Julia v1.3 and JuMP v0.21 The main motivation of writing this book was to help the author himself He is a professor in the field of operations research and his daily activities involve building models of mathematical optimization developing algorithms for solving the problems implementing those algorithms using computer programming languages experimenting with data etc Three languages are involved human language mathematical language and computer language His team of students need to go over three different languages which requires translation among the three languages As this book was written to teach his research group how to translate this book will also be useful

for anyone who needs to learn how to translate in a similar situation The Julia Language is as fast as C as convenient as MATLAB and as general as Python with a flexible algebraic modeling language for mathematical optimization problems With the great support from Julia developers especially the developers of the JuMP Julia for Mathematical Programming package Julia makes a perfect tool for students and professionals in operations research and related areas such as industrial engineering management science transportation engineering economics and regional science For more information visit <http://www.chkwon.net/julia>

Smart Spaces and Next Generation Wired/Wireless Networking Sergey Balandin, Yevgeni Koucheryavy, Honglin Hu, 2011-08-05 This book constitutes the refereed proceedings of the 11th International Conference on Next Generation Teletraffic and Wired Wireless Advanced Networking NEW2AN 2011 and the 4th Conference on Smart Spaces ruSMART 2011 jointly held in St Petersburg Russia in August 2011 The 56 revised full papers presented were carefully reviewed and selected from numerous submissions The ruSMART papers are organized in topical sections on role of context in smart spaces smart spaces platforms and smart M3 methods for studying smart spaces and smart spaces solutions The NEW2AN papers are organized in topical sections on wireless PHY and power control ad hoc networks WSN special topics simulation fundamental analysis I traffic modeling and measurement simulation fundamental analysis II network performance and QoS cooperative P2P overlay networks and content applications and services API and software and video

Modeling, Simulation and Optimization of Complex Processes HPSC 2018 Hans Georg Bock, Willi Jäger, Ekaterina Kostina, Hoang Xuan Phu, 2020-12-01 This proceedings volume highlights a selection of papers presented at the 7th International Conference on High Performance Scientific Computing which took place in Hanoi Vietnam during March 19-23 2018 The conference has been organized by the Institute of Mathematics of the Vietnam Academy of Science and Technology the Interdisciplinary Center for Scientific Computing IWR of Heidelberg University and the Vietnam Institute for Advanced Study in Mathematics The contributions cover a broad interdisciplinary spectrum of scientific computing and showcase recent advances in theory methods and practical applications Subjects covered include numerical simulation methods for optimization and control machine learning parallel computing and software development as well as the applications of scientific computing in mechanical engineering aerospace engineering environmental physics decision making hydrogeology material science and electric circuits

How to Solve Real-world Optimization Problems Eugene J. Zak, 2024-03-01 Written by an experienced operations research practitioner with a strong applied mathematics background this book offers practical insights into how to approach optimization problems how to develop intelligent and efficient mathematical models and algorithms and how to implement and deliver software products to customers With a focus on revealing the similarities and differences between academia and industry in mathematical modeling the book provides useful tips and advice based on the author's extensive experience as a principal developer working to solve real world optimization problems for several major high tech companies The book offers valuable food for thought for researchers and practical guidance for graduate

students preparing for their future projects in the industry It is also an essential resource for practitioners working in the industrial business and service sectors
