Question: Why did the plant in the closet not grow?

The plant in the closet didn't grow because it didn't get any sunlight. We put one plant in a sunny window and one in a dark closet. The plant in the window grew tall and green. The plant in the closet stayed small and turned yellow. Plants need sunlight to make their food. Without sunlight, they can't grow or stay healthy. To summarize, that's why the plant in the dark closet didn't grow.
