The book takes a broad and transdisciplinary scope by including contributions from the fields of philosophy, law, human factors, AI systems engineering, and policy development. Divided into five sections, Section I covers various practical models and approaches to implementing military AI responsibly. Section II focuses on liability and accountability of individuals and states. Section III deals with human control in human-AI military teams. Section IV addresses policy aspects such as multilateral security negotiations, and Section V focuses on autonomy and meaningful human control in weapons systems. Key Features: Takes a broad transdisciplinary approach to responsible AI. Examines military systems in the broad sense of the word. Focuses on the practical development and use of responsible AI. Presents a coherent set of chapters as all authors spent two days discussing each other's work.
