

# Assisting the Milk Ejection Reflex

This will help with relaxation and will help stimulate the milk ejection reflex.

1. Massage the milk producing cells and ducts. Start at the top of the breast. Press firmly into the chest wall. Move fingers in a circular motion on one spot on the skin

2. Stroke the breast area from the top of the breast to the nipple with a light tickle-like stroke.

3. Shake the breast while leaning forward so that gravity will help the milk eject.
